Reducing Global Inequities

Lei Huang

Reducing Global Inequities:

Reducing Global Inequities William Howard Wriggins, Gunnar Adler-Karlsson, 1978 SCOTT copy 1 from the John Holmes Library collection **Wealth Creation Approach to Reducing Global Poverty** Scott Hipsher, 2020-05-19 This book takes a unique approach to the topic of poverty reduction primarily employing an international business framework as opposed to the usual economic or political lens Some of the key ideas explored in the book include poverty is primarily the lack of choices not the lack of material possessions attacking inequality of opportunity might be a more effective means to reduce poverty than attacking inequality of wealth political systems matter but individuals and for profit firms also have a vital and indispensable role in helping to create the wealth needed to reduce poverty and an effective corporate social responsibility strategy to help reduce poverty may include finding innovative and creative ways to operate profitably in areas of the world where poverty is currently robbing too many people of the opportunity to live their version of the good life Building on such ideas the book advocates for private companies to expand operations into the least developed regions of the world as part of their corporate social responsibility programs and to reframe the debates away from ones focused on exploitation and economic nationalism to one of creating opportunities across political borders **Global Inequalities** Robert J. Holton, 2014-11-20 What causes global inequality Why should we be concerned about it Is inequality getting worse or are there signs of improvement and progress This critical analysis of the current state of global inequality pushes beyond ideological prejudice and simplistic explanations to address these important questions Offering a distinctive response to the many challenges in the area the text presents a holistic account of inequality by Taking a multidisciplinary approach incorporating perspectives from sociology politics and economics Recognising the influence of historical trends on inequality today And viewing inequality from a global perspective as well as a national one Drawing on major theories of inequality and up to date evidence Robert J Holton guides readers through the complex issues at hand making this text a valuable resource for students of sociology global studies politics and development studies *Reducing Global Poverty* Barry B. Hughes, Mohammad T. Irfan, Haider Khan, Krishna B. Kumar, Dale S. Rothman, Jose Roberto Solorzano, 2015-12-22 This is the first volume in an ambitious new series Patterns of Potential Human Progress inspired by the UN Millennium Development Goals MGDs and other initiatives to improve the global condition The first and most fundamental of these goals reducing poverty worldwide is the focus of this book Using the large scale computer program called International Futures IFs developed over three decades at the prestigious University of Denver Graduate School of International Studies this book explores the most extensive set of forecasts of global poverty ever made providing a wide range of scenarios based on an authoritative array of data It transcends the 1 a day baseline measure of poverty and probes important concepts like income poverty gaps and relative poverty The forecasts are long term looking 50 years into the future far beyond the 2015 date set out by the MDGs They are geographically rich spanning the entire globe and drilling down to the country level including one

of the most important global focal points India The poverty forecasts in this book and all the volumes in the series are fully integrated in perspective across a wide range of human development arenas including demographics economics politics agriculture energy and the environment Full of colorful thoughtfully designed graphs tables maps and other visual presentations of data and forecasts this large format inaugural volume ensures that the Patterns of Potential Human Progress series will become an indispensable resource for every development professional student professor library and indeed country around the world

Global Inequalities Orkan Köyağasioğlu, 2020-06-24 Globalization is characterized by a systemic interconnection in which what happens Inequality has been on the rise across the globe and living conditions are vastly unequal between different places in the world Currently the richest 1% own 45% of the world's wealth The consequence is that some people are able to enjoy healthy wealthy happy lives whilst others continue to live in ill health poverty and sorrow Rapid economic growth in Asia particularly China and India has lifted many people out of extreme poverty Nevertheless the wealth divide is steadily growing According to Oxfam between 2009 and 2018 the number of billionaires it took to equal the wealth of the world's poorest 50 percent fell from 380 to 26 Those with extreme wealth have often accumulated their fortunes on the backs of people around the world who work for poor wages and under dangerous conditions Women are scarce at the top and overrepresented at the bottom Gender discrimination in the workplace contributes significantly to these persistent economic divides There are also large differences in wealth across racial groups Long standing racial discrimination in many forms including in education hiring and pay practices contribute to persistent earnings gaps Inequalities have dramatically strengthened the economic and political power of those individuals at the top

Global Health Inequities Fernando De Maio, 2014-05-01 Despite living in a globalized world where advances in medicine technology and science come at an ever increasing pace there exist staggering inequalities in health Even as we celebrate new pharmaceutical developments access to already existing medicines is hindered by economic and political barriers for poor people around the world Critical but accessible Global Health Inequities questions taken for granted assumptions showing how breakthroughs in biomedicine alone cannot address inequities in health The book's analysis of theory and empirical work elucidates key debates and highlights the most significant challenges facing global health today including the growing burden of chronic non communicable diseases and the persistent injustice of neglected tropical diseases Fernando De Maio identifies the need for sociological analysis in global health drawing together research from public health sociology anthropology and related fields in order to expand the scope of the medical gaze towards a more holistic and structural perspective of health inequity

Global Inequalities Beyond Occidentalism Manuela Boatcă, 2016-04-22 Based on theoretical developments in research on world systems analysis transnational migration postcolonial and decolonial perspectives whilst considering continuities of inequality patterns in the context of colonial and postcolonial realities Global Inequalities Beyond Occidentalism proposes an original framework for the study of the long term reproduction of inequalities

under global capitalism With attention to the critical assessment of both Marxist and Weberian perspectives this book examines the wider implications of transferring classical approaches to inequality to a twenty first century context calling for a reconceptualisation of inequality that is both theoretically informed and methodologically consistent and able to cater for the implications of shifts from national and Western structures to global structures Engaging with approaches to the study of class gender racial and ethnic inequalities at the global level this innovative work adopts a relational perspective in the study of social inequalities that is able to reveal how historical interdependencies between world regions have translated as processes of inequality production and reproduction As such it will be of interest to scholars of sociology political and social theory and anthropology concerned with questions of globalisation and inequality **Global Inequality Matters D. Moellendorf, 2009-11-04** The globalization of trade investment and finance continues apace Many have benefited from this but deep inequalities persist This book argues that the interconnections established by globalization make possible a critique of its inequality For those who take seriously human dignity equality is a basic presumption of social institutions *Global Inequality*, 2025-08-28 The book contributes to a better understanding of the relationship between globalisation and transnationalisation and the development of social inequality It addresses this challenge in the current transition to a multi centred world The contributions by international experts from different continents and different disciplines bring together current research on global inequality and social classes covering a wide variety of thematic and spatial foci This also includes a comparison of analyses of inequality in a global context By bringing together analyses of inequalities in income wealth education political influence labor conditions and socio ecological inequalities among others the volume provides deeper insights into the ways in which global social inequalities are changing yet being reproduced in many ways in the 21st century It calls for a discussion on the global dimensions of unequal power relations Transitioning to Reduced Inequalities Sabin Bieri, Christoph Bader, 2023-02-09 The world has never been richer than today The distribution of our global wealth however is hugely biased Since 1980 the gains were mainly captured by the rich The top 1% obtained twice as much of the income growth as compared to the bottom 50% Nevertheless within economics debates about inequality have remained rather marginal despite long term research by renowned scholars such as Tony Atkinson Within the public arena concerns about inequality emerged as a result of a number of developments First the global financial crisis in 2008 exposed the risks of the financing of the economy secondly 2013 Thomas Picketty's book *Capital in the 21st century* demonstrated that against the trend of the overall 20th century capital returns outstrip the gains through economic growth in recent decades thus threatening social coherence and democratic institutions and thirdly the Millennium Campaign presented impressive achievements regarding poverty but stirred doubts whether the most deprived were left even further behind Since 2015 then the stated aim of SDG 10 is to reduce inequality within and among countries There is growing consensus that economic growth is not sufficient to reduce poverty and that our efforts to make it more inclusive so far were insufficient The very first

step reduce inequality is to adopt a systemic perspective allowing an integrative analysis covering both ends of the ladder Policies should be universal in principle and pay attention to the needs of disadvantaged and marginalized populations Predicated on comparison inequality reminds us that it s not enough to study lower earners and the poor Instead the term demands that we expand our perspective scrutinizing how economic value is generated accumulated at whose cost and not least how the overall system could be made fairer Transitioning to Reduced Inequalities therefore explores inequality trends worldwide offers a debate on different measures and comparative perspectives highlights key actors who either benefited or suffered from recent economic trends and explores policy options to reduce inequality and thus contribute to SDG 10 The volume considers particularly conceptual frameworks with regards to the inequality debate the relationship between poverty reduction economic growth and inequality measures of inequality overlooked bypassed groups in developing countries analysis on income wealth growth for different groups in the global north discussion about policies to reduce inequality and further research in the realm of inequality Transitioning to Reduced Inequalities is part of MDPI s new Open Access book series Transitioning to Sustainability With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world

SDG10 - Reduce Inequality Within and Among Countries Umesh Chandra Pandey, Chhabi Kumar, Martin Ayanore, Hany R. Shalaby, 2020-02-20 Defining inequality as the social economic and political challenges of our time this book will examine SDG10 to look ahead at how policy action might engage multiple stakeholders involve diverse sectors and address gaps between policy and implementation to tackle key inequalities within and among countries

Economic Inequality - Trends, Traps and Trade-offs Medani P. Bhandari, Shvindina Hanna, 2022-09-01 The book Economic Inequality Trends Traps and Trade offs presents the unexplored issues of economic inequality including case studies of various countries Inequality is a chronic divisive factor of society It is well known that inequalities such as economic social cultural religious geographical etc have been omnipresent in human society Inequalities can be found within each family each community and each nation and thus globally Inequality is a major cause of political economic social instability and creates crisis and conflict within society A major cause of inequality is unequal uneven biased power centric distributions of human economic social political cultural and spiritual human necessities The edited book examines the major parameters of the socio economic issues of inequality and focuses on the key economic issues of inequality namely income and wealth distribution equity equality of outcome and equality of opportunities Economic inequality is measured by wealth income dsiproportions in distribution and consumption patterns in a specific area Mostly inequality is measured using various statistical tools including the Gini Coefficient inequality adjusted human development index 20 20 ratio Palma ratio Hoover index Galt score Coefficient of variation Theil index wage share etc However not all income can be measured by these tools By using case studies this book encourages us to reframe economic development through the lens of growing inequalities and disparities Economic growth per se is disproportional and the efforts of scholars

practitioners and policymakers should be directed to empower the marginalized of society in a way that no one should left behind UN Slogan *Talking About Global Inequality* Christian Olaf Christiansen,Mélanie Lindbjerg Machado-Guichon,Sofia Mercader,Oliver Bugge Hunt,Priyanka Jha,2023-02-17 Comprising a collection of interview essays with nineteen public intellectuals and scholars from around the world this book reflects on some of the most pressing questions of our age what is global inequality what causes it and how should we deal with it Leading figures within the fields of History Sociology Economics Anthropology and Postcolonial Studies shed light on how their personal backgrounds places of work and hometowns have shaped their views on global inequality We learn about the causes of global inequality the historical factors that have shaped the world into an unequal place and the challenges that humanity is confronted with in the face of the widening gap between the poor and the rich Bringing together voices from the Global North and South this book helps us to think more broadly about inequality and deepens our understanding of how this long lasting phenomenon is and has been experienced across the globe **The Landscape of Global Health Inequity** Barbara W. K. Son,2024-07-10 This book presents a unique overview of significant disparities in health which exist within complex and multifaceted contexts across different regions In the twenty first century global health inequity presents substantial health challenges encompassing diverse and interconnected ramifications across socioeconomic cultural and political dimensions Additionally it thoroughly explores the interconnected and multifaceted underlying factors that are widespread in developing nations The book puts forth essential and comprehensive recommendations that call for collaborative efforts at multiple levels including global national and local to identify and address issues effectively Law and Global Health Michael Freeman,Sarah Hawkes,Belinda Bennett,2014-05-29 Current Legal Issues like its sister volume Current Legal Problems now available in journal format is based upon an annual colloquium held at University College London Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought Each colloquium examines how the external discipline is conceived in legal thought and argument how the law is pictured in that discipline and analyses points of controversy in the use and abuse of extra legal arguments within legal theory and practice Law and Global Health the sixteenth volume in the Current Legal Issues series offers an insight into the scholarship examining the relationship between global health and the law Covering a wide range of areas from all over the world articles in the volume look at areas of human rights vulnerable populations ethical issues legal responses and governance **Nanotechnology and Microelectronics: Global Diffusion, Economics and Policy** Ekekwe, Ndubuisi,2010-06-30 This book assesses the state of nanotechnology and microelectronics and examines many issues such as climate change trade innovation diffusion etc with a theme focused on facilitating the structures for the adoption and penetration of the technologies into developing nations Provided by publisher **the challenge of reducing international trade and migration barriers** Kym Anderson,L. Alan Winters,2008 *Cents and Sustainability* Michael H. Smith,Karlson Hargroves,Cheryl Desha,2010 Cents and Sustainability

is a clear sighted response to the 1987 call by Dr Gro Brundtland in Our Common Future to achieve a new era of economic growth that is forceful and at the same time socially and environmentally sustainable The Brundtland Report argued that not only was it achievable but that it was an urgent imperative in order to achieve a transition to sustainable development while significantly reducing poverty and driving clean and green investment With some still arguing for significantly slowing economic growth in order to reduce pressures on the environment this new book Cents and Sustainability shows that it is possible to reconcile the need for economic growth and environmental sustainability through a strategy to decouple economic growth from environmental pressures combined with a renewed commitment to achieve significant environmental restoration and poverty reduction Beginning with a brief overview of some of the most pressing environmental challenges of our time the book then explains decoupling theory overviews a number of factors that can undermine and even block efforts to decouple in both developed and developing countries and then discusses a number of key considerations to assist the development of national decoupling strategies The book then focuses on presenting evidence to support greater action not just on climate change but also on decoupling economic growth from the loss of biodiversity and the deterioration of natural systems freshwater extraction waste production and air pollution In the lead up to the 2012 United Nations Earth Summit and beyond Cents and Sustainability will be a crucial guide to inform and assist nations to develop strategies to significantly reduce environmental pressures strengthen their economy create jobs and reduce poverty I commend the team from The Natural Edge Project and their partners for undertaking to develop a response to Our Common Future to mark its 20th anniversary Dr Gro Brundtland Sequel to The Natural Advantage of Nations Published with The Natural Edge Project

Global Inequality David Held, Ayse Kaya, 2007-01-05 What is global inequality How can it be measured What are the major trends Addressing these questions this book examines the major issues that need to be confronted in conceptualising measuring and analysing patterns of global inequality It explores the implications of these patterns for politics and public policy

The Routledge International Handbook of Transnational Studies Margit Fauser, Xóchitl Bada, 2024-01-23 The Routledge International Handbook of Transnational Studies offers a comprehensive overview of the dynamic evolution and the most recent debates in this interdisciplinary field The collection assembles scholarship from the social sciences and the humanities that share a critical perspective extending beyond the nation state The contributions investigate sustained connections events and activities across state borders and acknowledge prevailing global power asymmetries The handbook examines the dynamics of transnational processes across seven main themes epistemological and methodological principles transnational migrant practices and family remittances mobilities and self identities social protection organizations and social movements culture religion and the arts and architecture and urban planning The contributors engage with theoretical developments and analyze empirical cases involving a wide array of critical contemporary topics such as expatriate voting first and second generation return migration state sponsored cross border marriages access to health care transnational

social work global religious aesthetics transnational art corridors literary translation remittance financed architecture and transnational processes of real estate development and gentrification among others They display a series of cross cutting approaches including postcolonial theory racism and gender and a focus on agency state policies and macro structures and transnational inequalities This book features multidisciplinary scholars in transnational studies from Australia Belgium Canada Finland Germany Italy Malaysia Mexico the Philippines Poland Spain Sweden the United Kingdom and the United States This handbook will be of interest to scholars interested in global and transnational perspectives across a wide range of disciplines It will serve as a key resource for academics students and other interested audiences seeking to familiarize themselves with the study of contemporary issues that cross state borders
