*The Cinematic Mirror for Psychology and Life Coaching* Mary Banks Gregerson, 2009-12-12 Cinema both reflects life and contours life that is its psychological power And for decades clinicians

and educators have recognized the value of this power using it to respectively heal in therapy and educate in the classroom. The Cinematic Mirror for Psychology and Life Coaching mines the illustrative value of cinema offering therapists and life coaches access to ideas that can motivate and enlighten clients. Although many movie guides exist, this volume complements the available literature by adding positive psychology, mental health, and wellness perspectives to the clinical/educational coaching mix. The serious intent to cull from cinema its underlying psychological value has motivated noted clinicians, life coaches, and cultural critics to offer science-based analysis and intervention strategies. Readers may add their own movie insights and professional expertise to this rich foundation. The volume covers international as well as domestic cinema in a variety of genres providing a range of film choices relevant to clients' lives. Beyond this, it expands on universal concepts of strengths, capabilities, and coping methods. Chapters in *The Cinematic Mirror* analyze how movies can create and relieve trauma, challenge Hollywood's portrayal of the American family, overview the use of movies to examine relationships in therapy, explore the acclaimed *Up* television cinema verite series as studies in personal growth and social change, reinterpret images of disability in terms of positive psychology, examine models or the lack thereof for the American adolescent rite of passage, trace the history of mental illness stereotypes in film. The collective wisdom found in *The Cinematic Mirror for Psychology and Life Coaching* will bring professionals involved in healing, coaching, counseling, education, and mentoring not only new applications but new appreciation for the transformative power of film. That power already exists. Readers just have to SEE it.

**Abnormal Psychology across the Ages** Thomas G. These experts present biological, psychological, social, cultural, and supernatural perspectives throughout human history on a range of disorders as well as the global influences on scientific thinking. A fascinating read for anyone in the field of abnormal psychology, from undergraduate students to clinicians, counselors, psychologists, and psychiatrists, this three-volume work addresses questions such as: What is abnormal psychology and thinking? What are the causes? How have we treated it and how do we treat it now? And how does the culture of the times affect what we perceive as abnormality?

*Child Psychopathology* Barry H. Schneider, 2014-12-04 This textbook covers the classification, causes, treatment, and prevention of psychological disorders in the infant through the adolescent years. Chapters balance the social and historical context of psychopathology with the physiological roots of abnormal behavior, leading students to a comprehensive understanding of child psychopathology. The book is totally up to date, including coverage of the DSM 5 and criticisms of it. In four parts, this textbook describes the empirical bases of child psychopathology as well as the practice of child psychologists, outlining the classification and causes of disorders in addition to methods of assessment, intervention, and treatment. Students will be able

to evaluate the treatments used by professionals and debunk popular myths about atypical behavior and its treatment. *Monsters, Demons and Psychopaths*, Fernando Espi Forcen, 2016-10-14. Descriptions of monsters, vampires, demonic possessions, and psychopaths in horror films have been inspired by psychiatric knowledge about mental illness, leading to several stereotyped models of horror that have prevailed through decades. Some scholars have proposed that horror films can be a teaching tool for psychopathology, but for the most part, the genre has been underutilized as a learning tool. This book explores the idea of relating horror films to psychiatric ideas as a way of engaging people in learning. *The Palgrave Handbook of the Philosophy of Film and Motion Pictures*, Noël Carroll, Laura T. Di Summa, Shawn Loht, 2019-10-30. This handbook brings together essays in the philosophy of film and motion pictures from authorities across the spectrum. It boasts contributions from philosophers and film theorists alike, with many essays employing pluralist approaches to this interdisciplinary subject. Core areas treated include film ontology, film structure, psychology, authorship, narrative, and viewer emotion. Emerging areas of interest, including virtual reality, video games, and nonfictional and autobiographical film, also have dedicated chapters. Other areas of focus include the film medium's intersection with contemporary social issues, film's kinship to other art forms, and the influence of historically seminal schools of thought in the philosophy of film. Of emphasis in many of the essays is the relationship and overlap of analytic and continental perspectives in this subject. **Performing**

**Hysteria**, Johanna Braun, 2020-11-16. We seem to be living in hysterical times. A simple Google search reveals the sheer bottomless well of hysterical discussions on diverse topics such as the metoo movement, Trumpianism, border wars, Brexit, transgender liberation, Black Lives Matter, COVID 19, and climate change, to name only a few. Against the backdrop of such recent deployments of hysteria in popular discourse, particularly as they emerge in times of material and hermeneutic crisis, *Performing Hysteria* re-engages the notion of hysteria. *Performing Hysteria* rigorously mines late 20th and early 21st century, primarily visual culture, for signs of hysteria. The various essays in this volume contribute to the multilayered and complex

discussions that surround and foster this resurgent interest in hysteria covering such areas as art literature theatre film television dance crossing such disciplines as cultural studies political science philosophy history media disability race and ethnicity and gender studies and analysing stereotypical images and representations of the hysteric in relation to cultural sciences and media studies Of particular importance is the volume's insistence on taking the intersection of hysteria and performance seriously
