Reengineering The Corporation A Manifesto For Business Revolution Chinese Text:

Contemporary Strategy Analysis Text Only Robert M. Grant, 2016-01-05 Robert M Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition, several topics have increased emphasis, including platform-based competition and ecosystems of related industries, the role of strategy-making processes, practices, mergers, acquisitions, and alliances, and additional emphasis on strategy implementation. *Professional Housing Management Practices in Hong Kong* Rebecca Lai-Har Chiu, 2006-10-01 Professional housing management is of growing importance in Hong Kong, and the Hong Kong management model is adopted in many neighbouring high-density cities. However, there has been by far no literature on the subject of housing management practices in Hong Kong. This book is therefore crucial in understanding how housing management makes significant contributions to the safety, viability, liveability, and vibrancy of our high-density and high-rise environment. Since the late 1980s, housing education in this city has developed by leaps and bounds. A recent study found that over 3 000 junior practitioners would be seeking professional training or further study for career advancement. This book is an indispensable aid to self-study or taught courses.

Contemporary Strategy Analysis Robert M. Grant, 2016-01-05 A strategy text on value creation with case studies. The ninth edition of *Contemporary Strategy Analysis: Text and Cases* focuses on the fundamentals of value creation with an emphasis on practicality. Topics in this edition include platform-based competition and ecosystems of related industries, the role of strategy-making processes, mergers, acquisitions, and alliances, and strategy implementation. Within the twenty case studies, students will find leading companies that are familiar to them. This strategy analysis text is suitable for MBA and advanced undergraduate students. *Topics on System Analysis and Integrated Water Resources Management* Andrea Castelletti, Rodolfo Soncini-Sessa, 2006-10-19 The Integrated Water Resources Management (IWRM) paradigm has been worldwide recognized as the only feasible way currently available to ensure a sustainable perspective in planning and managing water resource systems. It is the inspiring principle of the Water Framework Directive adopted by the European Union in 2000, as well as the main reference for all the water-related activity of UNESCO in the third world countries. However, very often, real-world attempts of implementing IWRM fail for the lack of a systematic approach and the inadequacy of tools and techniques adopted to address the intrinsically complex nature of water systems. This book explores recent and important contributions of System Analysis and Control Theory to the technical application of such paradigm and to the improvement of its theoretical basis. Its prior aim is to demonstrate how the modelling and computational difficulties posed by this paradigm might be significantly reduced by strengthening the efficiency of the solution techniques instead of weakening the integration requirements. The first introductory chapter provides the reader with a logical map of the book by formalizing the IWRM paradigm in a nine-step decisional procedure and by identifying the points where the contribution of System Analysis and Control Theory is more useful. The book is then

organized in three sections whose chapters analyze some theoretical and mathematical aspects of these contributions or presents design applications The outstanding research issues on the border between System Analysis and IWRM is depicted in the last chapter where a pull of scientists and experts coordinated by Prof Tony Jakeman describe the foreseeable scenario The book is based on the most outstanding contributions to the IFAC workshop on Modelling and Control for Participatory Planning and Managing Water Systems held in Venice September 28 October 1 2004 That workshop has been conceived and organized with the explicit purpose of producing this book the maximum length of the papers was unusually long of the size of a book chapter and only five long oral presentations were planned each day thus allowing for a very useful and constructive discussion Contributions from the leading world specialists of the field Integration of technical modelling aspects and participatory decision making Good compromise between theory and application *Professional Practices of Human Resource Management in Hong Kong* Anna P.Y. Tsui,K.T. Lai,2009-08-01 Faced with external and internal challenges such as globalization social changes and responsiveness to customers technological development cost containment and structural changes organizations now experience increasing levels of competition Evidence has shown a positive relationship between HR practices and business performance outcomes such as increased profitability and productivity Indeed HRM practices influence employee skills through the acquisition and development of human capital Also the use of well designed performance management systems and pay for performance incentives are important motivations in the workplace Written by HR professionals consultants legal experts and academics with decades of professional experience this volume covers the full spectrum of HRM practices in relation to their strategic contributions to organizations In a hands on and lively fashion it provides up to date HRM knowledge and skills with practical guidelines The purpose of the book is to enhance people management and gain competitive advantage in the fast moving business environment *Forthcoming Books* Rose Arny,2003 **International Books in Print** ,1986 *Australian National Bibliography* ,1994-09 **The Guardian Index** ,1993
