**Indigenous Futures and Learnings Taking Place** Ligia (Licho) López López, Gioconda Coello, 2020-12-09

Singularizing progressive time binds pasts presents and futures to cause effect chains overdetermining existence in education and social life more broadly Indigenous Futures and Learnings Taking Place disrupts the common sense of futures in education or knowledge for the future by examining the multiplicity of possible destinies in coexistent experiences of living and learning Taking place is the intention this book has to embody and world multiplicity across the landscapes that sustain life The book contends that Indigenous perspectives open spaces for new forms of sociality and relationships with knowledge time and landscapes Through Goanna walking and caring for Country conjuring encounters between forests humans and the more than human dreams dream literacies and planes of existence the spirit realm taking place ancestral luchas Musquem h n q min m Land pedagogies and resoluteness and gratitude for atunhetsla the spirit within the chapters in the collection become politicocultural and hi storical statements challenging the singular order of the future towards multiple encounters of all that is to come In doing so Indigenous Futures and Learnings Taking Place offers various points of departure to hi story educational futures more responsive to the multiplicities of lives in what has not yet become The contributors in this volume are Indigenous women women of Indigenous backgrounds Black Red and Brown women and women whose scholarship is committed to Indigenous matters across spaces and times Their work in the chapters often defies prescriptions of academic conventions and at times occupies them to enunciate ontologies of the not yet As people historically fabricated women their scholarly production critically intervenes on time to break teleological education that births patriarchal ized and master ized forms of living What emerges are presences that undiscipline education and educationalized social life breaking futures out of time This book will be of great interest to students and scholars of Indigenous studies future studies post colonial studies in education settler colonialism and colonality diversity and multiculturalism in education and international comparative education

**The Holy Trinity and the Law of Three** Cynthia Bourgeault, 2013-07-09 Just as she s done in her previous books Cynthia Bourgeault asks us to take a look at an idea from traditional Christianity this time the formula of Father Son and Holy Spirit as though we re looking at it for the first time And as usual she reveals it to be something we hadn t expected at all She finds in the idea of the Holy Trinity a striking vision of the nature of reality What she claims in a nutshell is that

embedded within this theological formula that Christians recite mostly on autopilot lies a powerful metaphysical principle that could change our understanding of Christianity and give us the tools so long and so sorely needed to reunite our shattered cosmology rekindle our visionary imagination and cooperate consciously with the manifestation of Jesus's Kingdom of Heaven here on earth She looks to the history of Christian theology to her own years of contemplative practice and to the ideas of G I Gurdjieff Her tone is as ever as accessible as it is compelling and it's a wild ride I will do my best to make the ride as smooth as possible she says but in the end my commitment is to getting there because I know beyond all personal doubt that there is indeed a ham radio concealed inside this Trinitarian tea cupboard And in the midst of this long winter of our Christian discontent when spiritual imagination and boldness are at an all time low and the church itself hovers at the edge of demise for lack of an animating vision perhaps now more than ever the time is ripe to remove the packing boards from this tea cupboard and release its contents

**Self-Reference** S.J. Bartlett,P. Suber,2012-12-06 Self reference although a topic studied by some philosophers and known to a number of other disciplines has received comparatively little explicit attention For the most part the focus of studies of self reference has been on its logical and linguistic aspects with perhaps disproportionate emphasis placed on the reflexive paradoxes The eight volume Macmillan Encyclopedia of Philosophy for example does not contain a single entry in its index under self reference and in connection with reflexivity mentions only relations classes and sets Yet in this volume the introductory essay identifies some 75 varieties and occurrences of self reference in a wide range of disciplines and the bibliography contains more than 1 200 citations to English language works about reflexivity The contributed papers investigate a number of forms and applications of self reference and examine some of the challenges posed by its difficult temperament The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of reflexivity and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy logic language and into the freedom personality and intelligence of persons

*Multidimensional Healing* Carol Dignam,2024-12-06 Multidimensional Healing offers a holistic physical psycho spiritual model of healing While the current global healthcare system biomedical allopathy is well suited to support physical healing using objective methods such as drugs it ceased to be well suited to support subtle energetic psycho spiritual healing when its subjective method of psychoanalytic regression was displaced by drugs The author Carol Dignam discovered an ancient narrative describing both physical and psycho spiritual healing in traditional myths When Hero myths describe men using weapons to kill bad guys to heal the kingdom they are describing how allopathic doctors use drugs to kill germs to heal the body When Heroine myths describe weavers meditatively unravelling and unravelling disharmonious threads until the weaving is magical they are describing how meditators unravel psychic trauma until the psyche is harmonious When both myths describe magical beings supporting the journey they are describing the psychic and spiritual parts supporting healing In search of a meditation supporting holistic physical psycho spiritual healing like the heroines of old the author began weaving

together the cross cultural subjective healing methods of shamanic journeying meditation prayer and regression until a universal somatic meditation shone through Likewise in search of an archetypal system that accurately described the psychic parts supporting psychic integration the author wove together the cross cultural archetypal systems until the second golden thread of a universal archetypal system shone through Like the Greek myth of Ariadne whose golden thread led Theseus safely through the labyrinth of his psyche the first golden thread was designed to lead the reader through their psychic labyrinth while the second illuminates the psychic parts therein supporting healing

*Serpent in the Sky* John Anthony West, 2012-12-19 John Anthony West's revolutionary reinterpretation of the civilization of Egypt challenges all that has been accepted as dogma concerning Ancient Egypt In this pioneering study West documents that Hieroglyphs carry hermetic messages that convey the subtler realities of the Sacred Science of the Pharaohs Egyptian science medicine mathematics and astronomy were more sophisticated than most modern Egyptologists acknowledge Egyptian knowledge of the universe was a legacy from a highly sophisticated civilization that flourished thousands of years ago The great Sphinx represents geological proof that such a civilization existed This revised edition includes a new introduction linking Egyptian spiritual science with the perennial wisdom tradition and an appendix updating West's work in redating the Sphinx Illustrated with over 140 photographs and line drawings

Transcending the Speed of Light Marc Seifer, 2008-08-13 A study of the new scientific understanding of

consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe

**Why Things Matter** David M. Black, 2011-04-08 In this book David M Black asks questions such as why do we care and what gives our values power using ideas from psychoanalysis and its adjacent sciences such as neuroscience and evolutionary biology in order to do so Why Things Matter explores how the comparatively new scientific discipline of consciousness studies requires us to recognize that subjectivity is as irreducible a feature of the world as matter and energy Necessarily inter disciplinary this book draws on science philosophy and the history of religion to argue that there can be influential values which are not based exclusively on biological need or capricious life style choices It suggests that many recent scientific critics of religion including Freud have failed to see clearly the issues at stake This book will be key reading for psychoanalysts and psychotherapists as well as counsellors with an interest in the basis of religious feeling and in moral and aesthetic values The book will also be of interest to scholars of psychoanalysis philosophy and religion

**The Night Sky, Updated and Expanded Edition** Richard Grossinger, 2014-09-30 Ever since Homo sapiens first looked up at the stars we as a species have been looking for meaning in the mysteries of the night sky Over the millennia as our knowledge science and technology developed the stories we told ourselves about the universe and our place in it developed as well In The Night Sky Richard Grossinger traces those developments covering multiple aspects of humanity s complex relationship to the cosmos Covering not only astronomy but also cosmology cosmogony astrology and science fiction he offers us a revelatory look at the firmament through his own telescope fitted with an anthropological lens Throughout his explorations Grossinger continually reflects on the deeper meaning of our changing concepts about the universe and creation offering insight into how each new discovery causes us to redefine the values moralities and aesthetics by which we live He also calls into question the self aggrandizing notion that humanity can and will conquer all and injects our strident

confidence in science with a healthy dose of humility and wonder Filled with poetic observation and profound questions The Night Sky is a brilliant reflection of humanity s relationship with the cosmos a relationship fed by longing doubt and awe
