**Climate, Environmental Hazards and Migration in Bangladesh** Max Martin, 2017-07-20 The apocalyptic visions of climate change that are projected in the media often involve extreme weather events disasters and mass migration of poor people This book takes a critical look at this notion drawing on research in Bangladesh a country located at the heart of debates on climate change and migration This book argues that rather than leading to dramatic events climatic and environmental impacts often cause incremental changes in people s habitats and livelihoods making them migrate in search of better places and income With or without climate change climatic and environmental factors can impoverish people and drive displacement and migration especially in the global South These influences including disasters need not necessarily make people move but instead sometimes trap the poorest and the most vulnerable people in their places exposed to hazards or make them migrate to even riskier places such as crowded and flood prone urban slums This book argues that restrictions placed on people s mobility options could increase their vulnerability and favours proactive migration policies This timely contribution explains the climate hazard migration nexus in an accessible engaging language for students of geography

development studies politics and environmental studies as well as humanitarian and development practitioners and policymakers

**Environment, Forced Migration and Social Vulnerability** Tamer Afifi, Jill Jäger, 2010-08-05 This book is one of the outputs of the conference on Environmental Change Forced Migration and Social Vulnerability EFMSV held in Bonn in October 2008 Migration is one of the oldest adaptation measures of humanity Indeed without migration the multitude of civilizations and interactions between them peaceful and otherwise would be hard to imagine The United Nations UN led global dialogue on migration is a clear sign that governments and the specialized UN agencies and bodies have recognized the need to view govern manage and facilitate migration to mitigate its negative effects and to capitalize on the positive ones It is a common expectation among experts that environmentally induced migration will further increase in the decades to come Hence next to the political economic ethnic social financial humanitarian and security aspects of migration the environmental component should urgently be considered in the ongoing international dialogue on migration This need is also a challenge Without appropriate scientific knowledge assessment definitions and classifications the intergovernmental frameworks would not be able to deal with these complex phenomena The Five Pronged Approach as formulated by the United Nations University UNU may serve as a framework to identify the additional dimensions of this challenge next to and actually simultaneously with the scientific one
