The Sectarian Spirit Paul T. Phillips,1982 *Religion and Society in a Cotswold Vale* Albion M. Urdank,2024-03-29

During the English Industrial Revolution the Vale of Nailsworth was a rural industrial settlement and a center of evangelical Nonconformity Why did the transition to the factory system bring deindustrialization and social decline rather than long term advancement Albion Urdank investigates the modernization of Nailsworth from many perspectives revealing the experience and the mentalit of ordinary people in their ecological economic and social environments His innovative approach in the tradition of the Leicester and Annales schools contributes to the historical literature on popular religion secularization local history and European industrialization and will appeal to a wide spectrum of interdisciplinary interests This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 **Religion and the Working Class in Nineteenth-Century Britain** Hugh Mcleod,1984-11-11 It might have been little more than an annotated bibliography It is in fact an important independent study in its own right The Expository Times

The Mid-Victorian Generation K. Theodore Hoppen,2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone s first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen s study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation **The Dynamics of**

Working-class Politics Michael Savage,1987 In an important contribution to a perennial debate Dr Savage argues that over concentration on national labour movements has ignored the variety of local political strategies developed by working class movements these variations show that working class politics develops on the basis of different types of solidarity rooted in various forms of local social structure Such mutations are not a recent development testifying to the decline of class politics but have been an enduring feature of capitalist societies In a detailed case study of Preston Lancashire Dr Savage shows how

the strategies and strengths of the various political parties changed between 1880 and 1940 as workplace solidarities gave way to neighbourhood based ones and as changing gender relations in the textile industry facilitated the organisation of women Its sophisticated use of sociological theory and detailed empirical analysis distinguish *The Dynamics of Working Class Politics* as one of the more important essays in historical sociology published in past years

Religious Routes to Gladstonian Liberalism J. P. Ellens, 2010-11 This book covering the period 1832 to 1868 describes how the so called church rates controversy contributed to the rise of a secular liberal state in England and Wales The church rate was an ancient tax required of all ratepayers regardless of denomination for the upkeep of parish churches of the Church of England This meant that Dissenters and other non Anglicans paid for the support of the established Church In the 1830s however the Dissenters determined to tolerate the situation no longer The resulting thirty six year struggle became the central church state issue of the Victorian period Ellens further argues that church rates played a pivotal role in the shaping of Victorian liberalism Dissenters desired a society in which church and state would be separate and religious affairs voluntary When Gladstone decided to champion the Dissenters voluntarist cause in the 1860s he established the relationship that would give him the solid basis of electoral strength he needed to carry out the great liberal reforms of his governments after 1868 Elegantly written and argued this book carefully details the process of disestablishment in England and Wales and uncovers an important and little recognized dimension to the formation of the Liberal party

The Victorian Music Hall Dagmar Kift, 1996-10-24 With the exception of the occasional local case study music hall history has until now been presented as the history of the London halls This book attempts to redress the balance by setting music hall history within a national perspective Kift also sheds a new light on the roles of managements performers and audiences For example the author confutes the commonly held assumption that most women in the halls were prostitutes and shows them to have been working women accompanied by workmates of both sexes or by their families She argues that before the 1890s the halls catered predominantly to working class and lower middle class audiences of men and women of all ages and were instrumental in giving them a strong and self confident identity The hall s ability to sustain a distinct class awareness was one of their greatest strengths but this factor was also at the root of many of the controversies which surrounded them These controversies are at the centre of the book and Kift treats them as test cases for social relations which provide fresh insights into nineteenth century British society and politics

F D Maurice and the Crisis of Christian Authority Jeremy Morris, 2005-03-18 This book offers a reassessment of the theology of F D Maurice 1805-72 one of the most significant theologians of the modern Church of England It seeks to place Maurice's theology in the context of nineteenth century conflicts over the social role of the Church and over the truth of the Christian revelation Maurice is known today mostly for his seminal role in the formation of Christian Socialism and for his dismissal from his chair at King's College London over his denial of the doctrine of eternal punishment Drawing on the whole range of Maurice's extensive published work this book argues that his theology and his social and educational activity were held together above all by his commitment to a renewal of Anglican ecclesiology At a time when following the social upheavals of the French Revolution and the Industrial Revolution many of his contemporaries feared that the authority of the Christian Church and particularly of the Church of England was under threat Maurice sought to reinvigorate his Church's sense of mission by emphasizing its national responsibility and its theological inclusiveness In the process he pioneered a new appreciation of the diversity of Christian traditions that was to be of great importance for the Church of England's ecumenical commitment He also sought to limit the damage of internal Church division by promoting a view of the Church's comprehensiveness that acknowledged the complementary truth of convictions fiercely held by competing parties

Shopkeepers and Master Artisans in Nineteenth-Century Europe Geoffrey Crossick, Heinz-Gerhard Haupt, 2016-07-01 First published in 1984 Shopkeepers and master artisans had a striking presence in the history of nineteenth century Europe not only in the development of industrial and urban economies but also the fabric of social life and the politics of protest The experience of 1848 the differing pace of various forms of nationalism and liberalism and at the end of the century the shift towards right wing nationalist or Catholic political movements reflected a developing crisis in the petite bourgeoisie The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth century Europe
