Security Dynamics Of Demographic Factors:

The Security Dynamics of Demographic Factors ,2000 This report presents a framework for understanding the implications of global demographic trends for international and U S national Security One of its goals is to spark discussion between demographers and national security analysts The document should be of interest to security analysts demographers foreign policymakers and general audiences interested in the implications of demographic trends for international security policy This research was jointly sponsored by the Population Matters project in RAND s Labor and Population Program and by the RAND Arroyo Center A principal goal of Population Matters is to inform both public and specialist audiences about the findings of demographic research and their implications for policy The Population Matters project is funded by grants from the William and Flora Hewlett Foundation the Rockefeller Foundation and the David and Lucile Packard Foundation The Arroyo Center is a federally funded research and development center sponsored by the United States Army This work inspired by prior research on alternative security futures conducted in the Strategy Doctrine and Resources Program of the Arroyo Center drew only from sources in the public domain The principal aim of this report is to provide a framework for understanding the influence of demographic factors on international security issues Specifically three major questions are addressed what current demographic trends pose international security concerns What are the security implications of these trends what are the implications for U S foreign defense and intelligence policies *Environmental Change and Security Project Report* ,2002 **Population Puzzle** Laura E. Huggins,Hanna Skandera,2013-09-01 Drawing from government reports think tank studies scholarly journals magazines newspapers and books this insightful overview offers a range of contrasting viewpoints and policy perspectives on the major issues concerning world population growth with particular emphasis on the impact of population trends on the United States **Germany's New Security Demographics** Wenke Apt,2013-12-04 Military recruitment will become more difficult in times of demographic aging The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests Since contemporary military operations still display a strong human element particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future A concluding review of recruiting practices in other NATO countries provides insight in best practice policy options to reduce the military s sensitivity to demographic change Following this approach the book gives prominence to a topic that has thus far been under represented in the greater discussion of demographic change today namely the demographic impact on international affairs and strategic calculations Dire Demographics Julie DaVanzo,Clifford Anthony Grammich,2001 Presents a Rand study of population trends in the Russian Federation **Demographics and the Changing National Security Environment** ,2000

Demographic factors seldom directly cause conflict between nations They can however exacerbate existing tensions and increase the risk of violent conflict Long term fertility trends urbanization migration and changes in the ethnic composition and age profile of populations can influence the likelihood and nature of conflict among and within nations Brian Nichiporuk explores these issues in *The Security Dynamics of Demographic Factors* seeking to answer three questions in particular First which demographic trends pose international security concerns Second what are the security implications of these trends Third what should the United States do in response to these issues The future international security environment of course will be determined by complex interactions between geographical alignments technologic%al advances economic developments environmental trends and demographic factors This research does not address all these complex interactions but it does note the direction in which demographic factors can affect security issues *Walking the Tightrope* Jaïr van der Lijn,2006 The media generally tend to focus in particular on the failures of U N peacekeeping operations In *Walking the Tightrope* Jaïr Van Der Lijn draws a different conclusion He argues once a peace agreement has been signed the efforts of the U N peacekeeping operations do contribute to durable peace By analyzing the U N peacekeeping operations in Cambodia Mozambique Rwanda and El Salvador in a structured focused comparison this book shows how U N operations do have a contribution to make *Environmental Security* Elizabeth L. Chalecki,2013-01-24 This timely volume presents the key concepts issues and debates surrounding environmental security illustrating through a range of examples and cases how global environmental matters and international security are closely linked Issues of climate change dwindling resources natural disaster and disease that comprise environmental security are at the forefront of global politics and the media today *Environmental Security A Guide to the Issues* is a primer for anyone attuned to these threats This well reasoned thought provoking volume establishes and updates the connection between global environmental problems and international security describing existing theories of environmental security and illustrating them with evidence from present day global ecological realities Specifically the book shows readers how both shortages and abundance of natural resources such as fresh water oil and natural gas and diamonds and timber can contribute to conflict and insecurity It also discusses how agriculture and fisheries issues affect food security with international ramifications how global ecosystem shifts like climate change are affecting both the earth and the movement of people on it and how war and preparation for war can affect the natural environment Finally the book explores how nations can and must cooperate with each other to confront and manage these threats *The Graying of the Great Powers* Richard Jackson,Neil Howe,2008-05-23 The demographic trends of the twenty first century will challenge the geopolitical assumptions of both the left and the right **BOOK JACKET** **Global Demographic Change and Its Implications for Military Power** Martin C. Libicki,Howard J. Shatz,Julie E. Taylor,2011-07-18 What is the impact of demographics on the prospective production of military power and the causes of war This monograph analyzes this issue by projecting working age populations through 2050 assessing the influence of

demographics on manpower national income and expenditures and human capital and examining how changes in these factors may affect the ability of states to carry out military missions
