Germany History remembers these places as the sites of unspeakable crimes against humanity and indisputably of genocide Yet throughout the twentieth century the world has seen many instances of violence committed by states against certain groups within their borders from the colonial ethnic cleansing the Germans committed against the Herero tribe in Africa to the Katyn Forest Massacre in which the Soviets shot over 20 000 Poles to anti communist mass murders in 1960s Indonesia Are mass crimes against humanity like these still genocide And how can an understanding of crime and criminals shed new light on how genocide the crime of all crimes transpires In *The Crime of All Crimes* criminologist Nicole Rafter takes an innovative approach to the study of genocide by comparing eight diverse genocides large scale and small well known and obscure through the lens of criminal behavior Rafter explores different models of genocidal activity reflecting on the popular use of the Holocaust as a model for genocide and ways in which other genocides conform to different patterns For instance Rafter questions the assumption that only ethnic groups are targeted for genocidal cleansing and she also urges that actions such as genocidal rape be considered alongside traditional instances of genocidal violence Further by examining the causes of genocide on different levels Rafter is able to construct profiles of typical victims and perpetrators and discuss means of preventing genocide in addition to delving into the social psychology of genocidal behavior and the ways in which genocides are brought to an end A sweeping and innovative investigation into the most tragic of events in the modern world *The Crime of All Crimes* will fundamentally change how we think about genocide in the present day *Gangland* Laura L.

The Gendered Society Michael S. Kimmel, 2000 They say that we come from different planets men from Mars women from Venus that we have different brain chemistries and hormones and that we listen speak and even define our morals differently How is it then that men and women live together take the same classes in school eat the same food read the same books and receive grades according to the same criteria In The Gendered Society Michael S Kimmel examines our basic beliefs about gender arguing that men and women are more alike than we have ever imagined Kimmel begins his discussion by observing that all cultures share the notion that men and women are different and that the logical extension of this assumption is that gender differences cause the obvious inequalities between the sexes In fact he asserts that the reverse is true gender inequality causes the differences between men and women Gender is not simply a quality inherent in each individual it is deeply embedded in society's fundamental institutions the family school and the workplace The issues surrounding gender are complex and in order to clarify them the author has included a review of the existing literature in related disciplines such as biology anthropology psychology and sociology Finally with an eye towards the future Kimmel offers readers a glimpse at gender relations in the next millennium Well written well reasoned and authoritative The Gendered Society provides a thorough overview of the current thinking about gender while persuasively arguing that it is time to reevaluate what we thought we knew about men and women
