Edwards IV,2020-09-30 Enormous changes affected the inhabitants of the Eastern Woodlands area during the eleventh through fifteenth centuries AD At this time many groups across this area known collectively to archaeologists as Oneota were aggregating and adopting new forms of material culture and food technology This same period also witnessed

an increase in intergroup violence as well as a rise in climatic volatility with the onset of the Little Ice Age In *Indigenous Life around the Great Lakes* Richard W Edwards explores how the inhabitants of the western Great Lakes region responded to the challenges of climate change social change and the increasingly violent physical landscape As a case study Edwards focuses on a group living in the Koshkonong Locality in what is now southeastern Wisconsin Edwards contextualizes Koshkonong within the larger Oneota framework and in relation to the other groups living in the western Great Lakes and surrounding regions Making use of a canine surrogacy approach which avoids the destruction of human remains Edwards analyzes the nature of groups subsistence systems the role of agriculture and the risk management strategies that were developed to face the challenges of their day Based on this analysis Edwards proposes how the inhabitants of this region organized themselves and how they interacted with neighboring groups Edwards ultimately shows how the Oneota groups were far more agricultural than previously thought and also demonstrates how the maize agriculture of these groups was related to the structure of their societies In bringing together multiple lines of archaeological evidence into a unique synthesis *Indigenous Life around the Great Lakes* is an innovative book that will appeal to archaeologists who study the Midwest and surrounding regions and it will also appeal to those who research risk management agriculture and the development of hierarchical societies more generally
