Workplace Flexibility underscores the need to realign the structure of work in time and place with the needs of the changing workforce. Considering the positive and negative consequences for employer and employee alike, the authors argue that although there is not an easy solution to creating and implementing flexibility practices in the United States or abroad, redesigning the workplace is essential if today's workers are effectively to meet the demands of life and work and if employers are successfully able to attract and retain top talent and improve performance. **Learning in the Workplace**
