Seeing Salvation Images Of Christ In Art:

Seeing Salvation Neil MacGregor, Erika Langmuir, 2000 In this text Neil MacGregor engages with images of Christ wherever they may be found throughout the world Through them he follows not only the life of Christ but also the development of Christian culture since His birth *Seeing Salvation* Angie Mason, Margaret Cooling, Neil MacGregor, Darcia Martin, Erika Langmuir, 2000-12 An educational book and video pack that engages with images of Christ wherever they may be found throughout the world and through them follows not only the life of Christ but also the development of Christian culture since His birth **The Power of Religion in Late Antiquity** Andrew Cain, 2016-09-17 Late Antiquity witnessed a dramatic recalibration in the economy of power and nowhere was this more pronounced than in the realm of religion The transformations that occurred in this pivotal era moved the ancient world into the Middle Ages and forever changed the way that religion was practiced The twenty eight studies in this volume explore this shift using evidence ranging from Latin poetic texts to Syriac letter collections to the iconography of Roman churches and Merovingian mortuary goods They range in chronology from the late third through the early seventh centuries AD and apply varied theories and approaches All converge around the notion that religion is fundamentally a discourse of power and that power in Late Antiquity was especially charged with the force of religion The articles are divided into eight sections which examine the power of religion in literature theurgical power over the divine emperors and the deployment of religious power limitations on the power of the ecclesiastical hierarchy the use of the cross as a symbol of power Rome and its transformation as a center of power the power of religion in the barbarian west and religious power in the communities of the east This kaleidoscope of perspectives creates a richly illuminating volume that add a new social and political dimension to current debates about religion in Late Antiquity **Reformed Theology and Visual Culture** William A. Dyrness, 2004-06-10 William Dyrness examines how particular theological themes of Reformed Protestants impacted on their surrounding visual culture **Visualising Britain's Holy Land in the Nineteenth Century** Amanda M. Burritt, 2020-04-11 This book demonstrates the complexity of nineteenth century Britain's engagement with Palestine and its surrounds through the conceptual framing of the region as the Holy Land British engagement with the region of the Near East in the nineteenth century was multi faceted and part of its complexity was exemplified in the powerful relationship between developing and diverse Protestant theologies visual culture and imperial identity Britain's Holy Land was visualised through pictorial representation which helped Christians to imagine the land in which familiar Bible stories took place This book explores ways in which the geopolitical Holy Land was understood as embodying biblical land biblical history and biblical typology Through case studies of three British artists David Roberts David Wilkie and William Holman Hunt this book provides a nuanced interpretation of some of the motivations religious perspectives attitudes and behaviours of British Protestants in their relationship with the Near East at the time The Origins of Protestant Aesthetics in Early Modern Europe William A. Dyrness, 2019-05-23 The aesthetics of everyday

life as reflected in art museums and galleries throughout the western world is the result of a profound shift in aesthetic perception that occurred during the Renaissance and Reformation In this book William A Dyrness examines intellectual developments in late Medieval Europe which turned attention away from a narrow range liturgical art and practices and towards a celebration of God s presence in creation and in history Though threatened by the human tendency to self assertion he shows how a new focus on God s creative and recreative action in the world gave time and history a new seriousness and engendered a broad spectrum of aesthetic potential Focusing in particular on the writings of Luther and Calvin Dyrness demonstrates how the reformers conceptual and theological frameworks pertaining to the role of the arts influenced the rise of realistic theater lyric poetry landscape painting and architecture in the sixteenth and seventeenth centuries

Arianism: Roman Heresy and Barbarian Creed Guido M. Berndt,2016-04-15 This is the first volume to attempt a comprehensive overview of the evolution of the Arian churches in the Roman world of Late Antiquity and their political importance in the late Roman kingdoms of the 5th 6th centuries ruled by barbarian warrior elites Bringing together researchers from the disciplines of theology history and archaeology and providing an extensive bibliography it constitutes a breakthrough in a field largely neglected in historical studies A polemical term coined by the Orthodox Church the side that prevailed in the Trinitarian disputes of the 4th century C E for its opponents in theology as well as in ecclesiastical politics Arianism has often been seen as too complicated to understand outside the group of theological specialists dealing with it and has therefore sometimes been ignored in historical studies The studies here offer an introduction to the subject grounded in the historical context then examine the adoption of Arian Christianity among the Gothic contingents of the Roman army and its subsequent diffusion in the barbarian kingdoms of the late Roman world

Projections of Memory Richard I. Suchenski,2016-06-30 Projections of Memory argues that the long form modernist art film of the twentieth century is more or less the direct conceptual descendant of the eighteenth century Romantic traditions that originated in literature painting and architecture

The Nature of Christian Doctrine Alister E. McGrath,2024-01-02 A groundbreaking account of the origins development and enduring significance of Christian doctrine explaining why it remains essential to the life of Christian communities Noting important parallels between the development of scientific theories and Christian doctrine Alister E

McGrath examines the growing view of early Christianity as a theological laboratory. We can think of doctrinal formulations as proposals submitted for testing across the Christian world rather than as static accounts of orthodoxy. This approach fits the available evidence much better than theories of suppressed early orthodoxies and reinforces the importance of debate within the churches as a vital means of testing doctrinal formulations. McGrath offers a robust critique of George Lindbeck's still influential *Nature of Doctrine* (1984) raising significant concerns about its reductionist approach. He instead provides a more reliable account of the myriad functions of doctrine utilising Mary Midgley's concept of mapping as a means of coordinating the multiple aspects of complex phenomena. McGrath's approach also employs Karl Popper's Three Worlds allowing the theoretical objective and subjective aspects of doctrine to be seen as essential and interconnected. We see how Christian doctrine offers ontological disclosure about the nature of reality while at the same time providing a coordinating framework which ensures that its various aspects are seen as parts of a greater whole. Doctrine provides a framework or standpoint that allows theological reality to be seen and experienced in a new manner; it safeguards and articulates the core vision of reality that is essential for the proper functioning and future flourishing of Christian communities.
