Chinese Strategy and Military Modernization in 2015 Anthony H. Cordesman, Steven Colley, 2016-01-12 China's emergence as a global economic superpower and as a major regional military power in Asia and the Pacific has had a major impact on its relations with the United States and its neighbors China was the driving factor in the new strategy the United States announced in 2012 that called for a rebalance of U S forces to the Asia Pacific region At the same time China's actions on its borders in the East China Sea and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers

Security and Development in Global Politics Joanna Spear, Paul D. Williams, 2012-03-06 Security and development matter they often involve issues of life and death and they determine the allocation of truly staggering amounts of the world's resources Particularly since the start of the wars in Afghanistan and Iraq there has been momentum in policy circles to

merge the issues of security and development to attempt to end conflicts create durable peace strengthen failing states and promote the conditions necessary for people to lead healthier and more prosperous lives In many ways this blending of security and development agendas seems admirable and designed to produce positive outcomes all around However it is often the case that the two concepts in combination do not receive equal weight with security issues getting priority over development concerns This is not desirable and actually undermines security in the longer term Moreover there are major challenges in practice when security practitioners and development practitioners are asked to agree on priorities and work together Security and Development in Global Politics illuminates the common points of interest but also the significant differences between security and development agendas and approaches to problem solving With insightful chapter pairings each written by a development expert and a security analyst the book explores seven core international issues aid humanitarian assistance governance health poverty trade and resources and demography Using this comparative structure the book effectively assesses the extent to which there really is a nexus between security and development and most importantly whether the link should be encouraged or resisted

Rethinking the Security-Development Nexus Sasha Jespersen, 2016-12-01 This book critically examines the security development nexus through an analysis of organised crime responses in post conflict states As the trend has evolved the security development nexus has received significant attention from policymakers as a new means to address security threats Integrating the traditionally separate areas of security and development the nexus has been promoted as a new strategy to achieve a comprehensive people centred approach Despite the enthusiasm behind the security development nexus it has received significant criticism This book investigates four tensions that influence the integration of security and development to understand why it has failed to live up to expectations The book compares two case studies of internationally driven initiatives to address organised crime as part of post conflict reconstruction in Sierra Leone and Bosnia Examination of the tensions reveals that actors addressing organised crime have attempted to move away from a security approach resulting in incipient integration between security and development but barriers remain Rather than discarding the nexus this book explores its unfulfilled potential This book will be of much interest to students of war and conflict studies development studies criminology security studies and IR in general
