China is one of the leading emerging countries in the world. It has experienced rapid growth over the past few decades and plays a key role in the global economy. Given the changing regulatory and economic landscape in China, the experiences and challenges of Chinese accounting and auditing offer useful insights to academics, practitioners, and policymakers around the world. Against this backdrop, there is an increasingly large and continuously growing academic literature on China-related accounting and auditing. The chapters in this volume showcase how accounting information relates to a wide spectrum of important issues, including carbon emissions, international trade, and the supply chain. It also considers the development of the audit market in China and highlights important future directions for accounting researchers interested in China-related studies. This book will be relevant for students and professionals of accounting, auditing, finance, and international business. It will be particularly useful for researchers, policymakers, and practitioners seeking to understand the nuances of China's financial practices and their broader implications.
