Bad Medicine Christopher Wanjek, 2003-04-07 Christopher Wanjek uses a take no prisoners approach in debunking the outrageous nonsense being heaped on a gullible public in the name of science and medicine Wanjek writes with clarity humor and humanity and simultaneously informs and entertains Dr Michael Shermer Publisher Skeptic magazine monthly columnist Scientific American author of Why People Believe Weird Things Prehistoric humans believed cedar ashes and incantations could cure a head injury Ancient Egyptians believed the heart was the center of thought the liver produced blood and the brain cooled the body The ancient Greek physician Hippocrates was a big fan of bloodletting Today we are still plagued by countless medical myths and misconceptions Bad Medicine sets the record straight by debunking widely held yet incorrect notions of how the body works from cold cures to vaccination fears Clear accessible and highly entertaining Bad Medicine dispels such medical convictions as You only use 10% of your brain CAT PET and MRI scans all prove that there are no inactive regions of the brain not even during sleep Sitting too close to the TV causes nearsightedness Your mother was wrong Most likely an already nearsighted child sits close to see better Eating junk food will make your face break out Acne is caused by dead skin cells hormones and bacteria not from a pizza with everything on it If you don't dress warmly you'll catch a cold Cold viruses are the true and only cause of colds Protect yourself and the ones you love from bad medicine the brain you save may be your own

Global Ageing in the Twenty-First Century Zachary Zimmer, 2016-04-22 Population ageing a growth in the proportion of a population that is in older age is now occurring in every region and nearly every country of the world Indeed the growth of older populations is among the important global phenomena of the twenty first century It poses both opportunities and challenges for societies and policy makers but these are far from uniform worldwide Dynamic factors are at work impacting on how ageing will influence people places and policies and there are large variations in the rate and timing of population ageing across countries owing to differing social health and economic circumstances and a variety of policy options from which to choose Given this variation in the context of global ageing as a backdrop this edited book focuses on three overarching themes that are among the most critical to understand if societies are to age successfully in the twenty first century and beyond Healthy ageing and health care the ageing workforce retirement and the provision of pensions shifting intergenerational relations These three themes are cross cut by other dimensions that are intertwined with the dynamic processes of ageing such as immigration emigration contrasting policy regimes and global and national economic forces This ground breaking book will be of interest to all scholars students and policy makers working within this area of study

Riding the Diabetes Rollercoaster Helen Cooper, Robert Geyer, 2018-04-19 This work includes foreword by Ian Botham OBE former England Cricket Captain and father of a daughter with Type 1 Diabetes This groundbreaking book reveals how science and medicine have traditionally tried to make diabetes simple and orderly despite its obvious messiness and complexity The result has left patients carers

and health professionals confused and frustrated Using complexity science Riding the Diabetes Rollercoaster provides a radical new approach to understanding and managing diabetes that embraces its uncertainties and challenges From a complexity perspective the diabetes rollercoaster is normal and is a mirror of life itself Learning to embrace and use the tools of complexity can completely alter your approach to diabetes Despite huge amounts of research funding and effort diabetes like many other chronic illnesses refuses to go away or even to get any easier to deal with Health professionals have grown increasingly frustrated with their inability to develop radical improvements patients and carers struggle to comply with complicated self management regimes We believe that Complexity offers a way forward Learning to balance rather than control diabetes is the ultimate goal of diabetes management Helen Cooper and Robert Geyer in the Preface

Echoes of Yesterday Amanda M. Biancardi, 2005-11 Each person has a story to tell Even in the most similar of circumstances life always leaves a custom ceil on the soul It s almost as if we are all standing around and looking through a great bay window gazing upon a single tree at the top of a hill footed with a collection of shrubs and grass The echoes of our past present and future color our vision While you may be enjoying a vivid memory of a walk in the park full of bright green trees and ocean blue skies your neighbor indulges within a plethora of poignant memories full of emptiness As others gather round the window they may see fear light or even hope of salvation Often while peering through our own window of life different circumstances can leave anyone in another neck of the woods Though no matter how peculiar lonely or wonderful your walk has become always remember your past embrace your present and thrive for everything tomorrow will let you become Enjoy this heartwarming combination of collaborating short stories and poetry that will surely relate to everyone s Echoes of Yesterday

A Public Health Perspective on End of Life Care Joachim Cohen, Luc Deliens, 2012-01-19 Worldwide more than 50 million people

die each year and it is estimated on the basis of the conditions leading to death that up to 60% of them could benefit from some form of palliative care. It is a public health challenge to ensure that these people can access good palliative or end of life care. Pursuing good population health essentially also implies striving for a good enough death and a good quality of care at the end of life. Safeguarding a good quality of the end of life for patient populations for whom it is appropriate requires a public health approach. In most developed countries ageing populations that increasingly die from chronic diseases after a prolonged often degenerative dying trajectory make up the public health challenges for palliative care. The very large baby boom generation will soon reach old age and can be expected to pose strong demands regarding the circumstances and care at their end of life. Only by applying a public health approach to palliative care instead of individual patient perspectives can societies successfully help to organize and plan end of life care in accordance with these aspirations. A Public Health Perspective on End of Life Care presents a synthesis and overview of relevant research and empirical data on the end of life that can bear a basis for a more systematic public health of the end of life. The book focuses on population health rather than clinical interventions or other aspects of individual health and discusses studies using different methodologies not only epidemiological research. The focus is on the quality of the end of life of populations in particular from social sciences, environmental sciences and humanities perspectives.
