The Encyclopedia Americana ,1922 Europe Jean Baptiste Duroselle,2023-11-09 Whether as an epic battleground or a cradle of civilizations Europe has left an enduring imprint on the history of the world for over two millennia From megalithic civilizations through ancient times the Renaissance the Industrial Revolution the rise of nationalism two world wars and the years that followed this book looks beyond a series of distinct national histories to offer the history of Europe as an often shared experience across one continent This book delves into events such as the fall of the Berlin Wall traces the continent's evolution from the collapse of Communism through the Iraq War global financial crisis Brexit and Russia's invasion of Ukraine And then looking forward it

explores what would be necessary for the continent to remain a global power player for years to come **The Making of Modern Europe, 1648-1780** Geoffrey Treasure,2003-12-16 In 1640 the term Europe was without real political significance In the following years the idea of Europe came to mean much more a period documented in this fascinating book *State Formation in Europe, 843-1789* Sverre Bagge,2019-06-03 State Formation in Europe 843 1789 follows the formation and development of the European state from the division of the Carolingian Empire to the French Revolution The book s primary focus is on Europe s patterns of internal and external development in comparison to political organization in other parts of the world By analysing Europe as a single unit rather than dividing it into nation states it reveals the broader historical connections within the Continent Bagge takes the reader through a discussion of how kingdoms evolved into states introducing the influence of the Church and the town on these state structures The relationship between state Church and town is traced to explain how these different power struggles played out and why the territorial state became the dominate form of organization Finally the book clarifies why Europe developed in this way and the global consequences of this development By observing Europe through the perspective of the rest of the world readers gain insight into trends common to the whole Continent while crossing the traditional border between the Middle Ages and early modern period This book is essential reading for students studying medieval and early modern political history state formation and Europe in a global context *The Americana* ,1923 *Events That Formed the Modern World* Frank W. the art of war military revolutions state development and European expansion Essentials in Early European History Samuel Burnett Howe,1912 **Escaping the Deadly Embrace** Andrea Bartoletti,2022-11-15 Encirclement Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war Using historical case studies Escaping the Deadly Embrace examines how great powers try to escape the two front war problem and seek to preserve their security Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power The surrounding great powers may not have the capacity to initiate a joint invasion Yet their threatening presence triggers a double security dilemma for the encircled great power which has to disperse its army to secure its borders When the surrounding great powers become capable of launching a two front attack the encircled great power initiates war This situation disastrous in itself can also lead to war contagion when other great powers intervene in the new conflict owing to the rival based network of alliances Combining archival work and historiographical analysis Escaping the Deadly Embrace demonstrates the efficacy of this by assessing three major wars the Italian Wars the Thirty Years War and World War I These findings Bartoletti shows have important implications for future major wars Challenging the current focus on the US China rivalry he argues that the most concerning strategic scenario is the encirclement of China by India and Russia *History of the Law of Nations in Europe and America* Henry Wheaton,1845
