A Curious Intimacy Lois Oppenheim, 2013-01-11 What can neuroscience contribute to the psychodynamic understanding of creativity and the imagination A Curious Intimacy is an innovative study into the interrelation between art and neuro psychoanalysis which significantly narrows the divide between the humanities and the sciences Situating our grasp of the creative mind within the historical context of theories of sublimation Lois Oppenheim proposes a change in paradigm for the study of the creative process questioning the idea that creativity serves above all the reparation of early object relationships and the resolution of conflict The book is divided into two parts Part One Art and the Brain introduces the field of neuro psychoanalysis and examines the contribution it can make to the discussion of gender and art Part Two A New Direction for Interdisciplinary Psychoanalysis draws on the verbal and visual artistry of Samuel Beckett Paul Klee and

Martha Graham to put to the test the proposed new direction for applied psychoanalysis Lois Oppenheim concludes by addressing the future of psychoanalysis as it becomes increasingly informed by neuroscience and raising questions about what the neurobiology of emotion and feeling has to tell us about the creative experience of an individual and what might constitute a neuro psychoanalytic aesthetics A Curious Intimacy will have great appeal for all those interested in the study of imagination and creativity It will also be of particular interest to students across the humanities and sciences and to psychotherapists and psychoanalysts wanting to explore the contribution that neuro psychoanalysis can make to our understanding of the creative process

The Wall Beside the Work Derek Pigrum, 2021-06-23 This book is about the way artists generate an endless chain of substitute objects for something they can never quite find It explores the work involved in art with a focus upon finding gathering and assembling charged and auratic objects on the wall beside the work The author employs the term Das Gegenwerk or the work towards the work This concept avoids definitive closure and expands the notion of drafting and related practices to include qualitative research methods The multi mode transitional practices of Das Gegenwerk are devoid of any demand for a preconceived goal but instead hinge upon the provisional and indeterminate As such it is a far cry from the binary logic of the computer and the design cycle but is of interest to an audience engaged with both Das Gegenwerk hinges on our capacity to respond to the outside rather than the inwardness often attributed to creative agency A fundamental belief of the book is that by investigating and adapting the practices of expert practitioners we can gain an understanding of high level creativity It is neither a recipe nor a linear or cyclic approach Rather artistic creation is an interweave of transitional multi mode practices where the overriding emphasis is on the handling or habituation of transitional materials in physical place The author addresses the urgent need to provide a balance between the promise of new technology and our capacity to both respond to and work with what the world bestows
