**Rockets Into Space** Frank H. Winter,1990 Since ancient times men and women have dreamed of soaring among the stars but only in this century has that dream been realized In *Rockets into Space* Frank Winter tells the fascinating story of the modern launch vehicle from the mythological musings of the Babylonians and Greeks to the present day reality of manned and unmanned space flight In concise yet comprehensive chapters dense with anecdotal detail Winter tracks the theoretical formulations and technological breakthroughs that have charted the evolution of rocket propulsion and vehicle design He pays particular attention to the remarkable contributions of pioneers Konstantin Tsiolkovsky Robert Goddard Hermann Oberth Eugen S nger and Sergei Korolev whose genius and vision paved the way for later innovation He describes the clandestine development of the V 2 rocket in Germany under the technical leadership of Wernher von Braun and its dramatic impact on postwar rocket research and satellite development in the United States and the Soviet Union He also chronicles the complex events of the last three decades which have produced ever more sophisticated rockets capable of launching larger payloads from weapons to weather and communications satellites Finally he surveys exotic propulsion systems nuclear electric solar photon laser that lie on the frontiers of science today but that will shape the spaceflight and space policy decisions of tomorrow *Rockets into Space* is an authoritative entertaining guidebook for all who are interested in the history of space travel **Science, Religion, and Mormon Cosmology** Erich Robert Paul,1992 Merrill who urged a unique vision of reality that shaped a Mormon eschatology He shows how authorities eventually retreated from the perception of reality as true and adopted a scientifically less secure position in order to protect their theology an eventuality which ultimately resulted in a reactionary response to science within Mormonism *Wonder and Science* Mary Baine Campbell,2016-05-02 During the early modern period western Europe was transformed by the proliferation of new worlds geographic worlds found in the voyages of discovery and conceptual and celestial worlds opened by natural philosophy or science The response to incredible overseas encounters and to the profound technological religious economic and intellectual changes occurring in Europe was one of nearly overwhelming wonder expressed in a rich variety of texts In the need to

manage this wonder to harness this imaginative overabundance Mary Baine Campbell finds both the sensational beauty of early scientific works and the beginnings of the divergence of the sciences particularly geography astronomy and anthropology from the writing of fiction Campbell's learned and brilliantly perceptive new book analyzes a cross section of texts in which worlds were made and unmade these texts include cosmographies colonial reports works of natural philosophy and natural history fantastic voyages exotic fictions and confessions Among the authors she discusses are Andr Thevet Thomas Hariot Francis Bacon Galileo Margaret Cavendish and Aphra Behn Campbell's emphasis is on developments in England and France but she considers works in languages other than English or French which were well known in the polyglot book culture of the time With over thirty well chosen illustrations Wonder and Science enhances our understanding of the culture of early modern Europe the history of science and the development of literary forms including the novel and ethnography

Yesterday's Tomorrows W. H. G. Armytage, 2021-12-24 First published in 1968 Yesterday's Tomorrows elucidates on the favourite occupation of man forecasting the future By man's predictions he mirrors his own wish fulfilments displacements projections denials evasions and withdrawals These predications can take the form of countries of the imagination mirror worlds like Rabelais Ever Ever lands or the Erewhon of Butler Alternatively they may spring from panic reflecting fear rather than hope often manifesting themselves in our technological age as reports of flying saucers or invasions from another planet In either form they provide philosophers scientists doctors and sociologists with material for evaluating man's future needs offering both criticism of our present society plans for our future and release from tension and disequilibrium Professor Armytage shows in this book how such visions can and do refresh minds for renewed grappling with the present by arming them with ideas for man's future needs He indicates that out of an apparent welter of futuristic fantasies a constructive debate about tomorrow is emerging providing us with operational models of what tomorrow could be This book will hold special interest for students of philosophy and of English literature
