Jeannie Lum, 2018-04-19

In 1999 the UN instituted the Program of Action on a Culture of Peace leading to the Declaration of the International Decade for the Promotion of a Culture of Peace and Non-Violence for the Children of the World 2001-2010. This represented a paradigm shift away from the prevailing conceptualization of peace as the absence of war to one of creating cultures of peace and indicated a significant opening for peace educators and the expansion of their mission and field in peace research and scholarship. This book seeks to address several questions about the emergence, present state and future of the field of peace education and to ground the definition of the discipline in its origins, origins deeply set in informal grassroots movements of concerned citizens, faith-based communities and professional organizations who work for peace as well as those working in formal institutions. These origins are vital in imparting identity and in nurturing the current growing collective consciousness that combines the academic discipline and the worldwide peace movement, a collective that can unify, fuel and inspire dialogue among scholars, researchers, activists, educators, government leaders and the myriad of individuals committed to creating cultures of peace throughout the world. This book was originally published as a special issue of the *Journal of Peace Education*. **Ethnic Marketing** Guilherme Pires, John Stanton, 2018-12-17 Together with the development of

transformative technologies that epitomize globalization the ongoing movements of people across borders and other socio economic pressures are creating a fast changing business environment that is difficult for business to understand let alone control Dominant social expectations that immigrants should seek to adopt an assimilationist socialization path towards the host country s mainstream are contradicted by minority ethnic group resilience There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries Since ethnic minority consumers cannot be expected to assimilate then they maintain some significant degree of unique ethnicity related consumer characteristics that convert into threats and opportunities for business The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business Following from the extensive examination of scholarly perspectives of ethnic marketing theory there is an acknowledged and marked divide between theoretical exhortations and what is done in practice a relative oversight of the implications of mixed embedded markets and a propinquity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities Keeping a focus on the ethnic group as the unit of analysis combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives The ultimate objective is to reduce the theory practice divide through the development of a collaborative framework between business and scholars that converts into theory in use

Cohesion and Dissolution Ingo Rohrer,2013-11-26 The apocryphal story of punk and hardcore is narrated as a history of young rebels united by shared interests values and a sense of equality Through the example of the scene of Buenos Aires Ingo Rohrer demonstrates that this unity is fragile and requires different practices of maintenance to ensure the cohesive continuity of the community Friendship is the focus of these efforts but at the same time it is also a point of vulnerability where the group s dissolution and disappointment about the scene germinates Ingo Rohrer examines how a local scene s quest for cohesion is concurrent with tensions and contradictions Beyond the attention put on the friendship in the local scene the author asks what role friendships play in the local life world of neighborhoods and in the globalized punk and hardcore scene Based on rich empirical data the author suggests new perspectives on group processes and local transnational relations with relevance far beyond the realm of these vibrant music scenes
