The Politics and Civics of National Service Melissa Bass, 2013-01-03 In 1933 President Franklin D Roosevelt created America's first domestic national service program the Civilian Conservation Corps CCC As part of this program the largest and most highly esteemed of its kind nearly three million unemployed men worked to rehabilitate protect and build the nation's natural resources It demonstrated what citizens and government could accomplish together Yet despite its success the CCC was short lived While more controversial programs such as President Johnson's Volunteers in Service to America VISTA and President Clinton's AmeriCorps survived why did CCC die And why given the hard won continuation and expansion of AmeriCorps is national service an option for fewer Americans today than at its start nearly eighty years ago In The Politics and Civics of National Service Melissa Bass focuses on the history current relevance and impact of domestic civilian national service She explains why such service has yet to be deeply institutionalized in the United States while military and higher education have solidified their roles as American institutions civilian national service is still not recognized as a long term policy option Bass argues that only by examining these programs over time can we understand national service's successes and limitations both in terms of its political support and its civics lessons The Politics and Civics of National Service furthers our understanding of American political development by comparing programs founded during three distinct political eras the New Deal the Great Society and the early Clinton years and tracing them over time To a remarkable extent the CCC VISTA and AmeriCorps reflect the policymaking ethos and political controversies of their times illuminating principles that hold well beyond the field of national service By emphasizing these programs effects on citizenship and civic engagement The Politics and Civics of National Service

Writing Against Hitler Daniel Siemens, 2025 In Writing Against Hitler Daniel Siemens reconstructs the history of the struggles of socialist intellectuals in Germany from the 1920s through the post World War II era by focusing on the life of one influential member of that group Hermann Budzislowski 1901-78 In the 1930s Budzislowski served as the editor in chief of the prominent antifascist journal *Die neue Weltbühne* After the German occupation of France he worked in exile in the United States until 1948 when he moved to East Germany He became influential in training a new generation of journalists and worked as a politician Through the twin stories of a highly ambitious figure and the legendary publication he headed Siemens charts the course of the intellectual Left's rise and decline in power during the decades that

shaped the political divides of the mid twentieth century Crucially his account challenges the widely held belief that post 1989 German unification has represented a victory over the traumas of the past Instead Siemens shows the complexity of different strains of socialist thought and activity and reveals the contested place of Nazi Germany s exiles at the center of Cold War Germany s cultural history
