Corwin, 1993-09-21 Namboodiri and Corwin make a strong case for adopting a macro perspective in sociological investigations They begin with an analysis of the micro perspective with emphasis on the so called individual as the unit of observation and analysis They then proceed to a general discussion of the macro perspective with particular emphasis on organizational networks as study objects Rival paradigms for the analysis of organizations are reviewed The study of interdependence among entities such as organizations is discussed and the use of input output framework for such studies is expounded Recommended for scholars conducting research or teaching courses on organizations in sociology political science and administration **The SAGE Glossary of the Social and Behavioral Sciences** Larry E. Geyer, D.R. Schweitzer, 2012-12-06 The original papers which appear in this volume were initially presented in a series of sessions of the Ad Hoc Group on Alienation Theory and Research at the 1974 World Congress of Sociology in Toronto Canada This group was organized by the editors as a result of their longstanding research and teaching interest in the field The purpose of the Toronto sessions was to provide an international forum where scholars and researchers could come to gether for a personal exchange of ideas and research findings To our know ledge this was the first forum of its kind concerned specifically with aliena tion theory and research

More than fifty theoretical and empirical papers from thirteen countries and several overlapping disciplines were organized into panels and workshops during the span of four days The response to these sessions indicates that interest in the study of alienation by philosophers and social scientists continues unabated The Toronto sessions were organized largely around a fundamental concern for further theoretical development and conceptual clarification in the alienation field The papers selected for this volume reflect this thematic concern Although many excellent empirical papers were presented it was generally felt that meaningful empirical research would benefit from a continued elaboration and refinement of alienation theory The present collection is consequently geared to problems of meaning theory and method Considerable emphasis is also placed on a critical evaluation of the alienation theme as it has evolved from social philosophy to empirical social research
