ORRRC Study Report, 1962

Chicago, This book provides a comprehensive portrayal of the growth and development of Chicago from the mudhole of the prairie to today's world class city. This completely revised fourth edition skillfully weaves together the geography, history, economy, and culture of the city and its suburbs with a special emphasis on the role of the many ethnic and racial groups that comprise the real Chicago of its neighborhoods. *ORRRC Study Report*. 1-27, 1962. U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973 United States. Environmental Protection Agency. Library Systems Branch, 1974

Chicago's North Michigan Avenue John W.

Stamper, 1991-08-27 Since its opening in the 1920s Chicago's North Michigan Avenue has been one of the city's most prestigious commercial corridors lined by some of its most architecturally distinctive business, residential, and hotel buildings. Planned by Daniel Burnham in 1909, the avenue became the principal connecting link between downtown and the wealthy residential Gold Coast north of the Loop. Some thirty buildings were constructed along its path in the ten-year period before the Depression, an urban expansion comparable in significance to that of Pennsylvania and Park Avenues. John W. Stamper traces the complex development of North Michigan Avenue from the 1880s to the 1920s building boom that solidified its character and economic base, describing the initiation of the planning process by private interests to its execution aided by the city's powerful condemnation and taxation proceedings. He focuses on individual buildings constructed on the avenue, including the Renaissance and Gothic inspired Wrigley Building, Tribune Tower, and Drake Hotel, and places them within the context of factors governing their construction: property ownership, financing, zoning laws, design theory, and advertising. Stamper compares this stylistically diverse mixture of low and high-rise structures with earlier rejected planning proposals, all of which had prescribed a uniformly designed European-like avenue of continuous cornice heights, consistent facade widths, and complementary stylistic features. He analyzes the drastically different character the avenue took by 1930 with high-rise towers reaching thirty stories and beyond in terms of the clash among economic, political, and architectural interests. His argument that the discrepancies between the rejected plans and reality illustrate the developers' choice of economic return on their investment over aesthetic community is extended through to the present avenue and the virtual disregard of the urban qualities proposed at its inception. Generously illustrated with an epilogue condensing the avenue's history between the end of World War II and the present, this is an exhaustive account of an important topic in the history of modern architecture and city planning. Urban Transportation Research and Planning. Current Literature, 1961

Reviewing **Metropolitan Chicago An Economic Analysis**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is actually astonishing. Within the pages of "**Metropolitan Chicago An Economic Analysis**," an enthralling opus penned by a highly acclaimed wordsmith, readers embark on an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve in to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.
