Metropolitan Enigma:

The Metropolitan Enigma James Q. Wilson, 1968 In a society which has made urban crisis a phrase peculiarly its own it is strange how many different meanings are assigned to those two words The theme of this book is that it is more important to disentangle and analyze the various problems which are indiscriminately referred to by this phrase than simply to issue a call to arms To paraphrase the editor of *The Metropolitan Enigma* James Q Wilson not everything about cities constitutes a problem and not all problems to be found in cities are distinctively urban This book seeks to explore the complexities and clear away the easy generalizations that prevent an understanding of the human problems of an urbanizing nation The essays in this book were written by Daniel P Moynihan Poverty in Cities Bernard J Frieden Housing and National Urban Goals Edward C Banfield Rioting Mainly for Fun and Profit and other perceptive students of American society Some of the papers reveal unexpected findings others take an unusual perspective each provides a fresh and lucid treatment of a difficult subject No effort has been made to produce a work animated by a single point of view A central idea of *The Metropolitan Enigma* is that there is no all embracing strategy that can be put forward as an effective solution for the urban crisis Directed to everyone who is interested in the future of the American city this is an important and valuable book The volume was first published in a soft cover edition by the Task Force on Economic Growth and Opportunity of the United States Chamber of Commerce in 1966 The Joint Center for Urban Studies of M I T and Harvard commissioned the articles Each of the contributors has had an opportunity to revise his paper and several essays have been substantially rewritten Edward Banfield's essay appears here for the first time

Metropolitan Problems S. Miles, 2013-05-13 *Metropolitan Problems* is the end product of one of the most dynamic research programmes of its kind ever conceived and executed The book which took three years to complete represents the culmination of a two year study that was highlighted by a conference held in Toronto in 1967 In the early 1960s the bureau of Municipal Research in metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas The study with the official cooperation of the United Nations was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts Working with these experts were study groups drawn from forty major metropolitan centres throughout the world After making exhaustive studies of their respective urban centres the groups reported their findings and submitted detailed briefs through their representatives at the conference Throughout the symposium a conscious effort was made to examine single aspects of social economic and physical change within the overall perspective of the metropolis The book reflects this approach Each chapter directs attention to specific problems of the metropolis problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change Together they prove that despite differences in technology

culture and political and social matters the major urban areas of the world do have much in common Emerging tendencies can be analysed and corrective and preventative measures be made through comparative analysis This book was first published in 1970 *The City* Alan S. Berger,1978 **The Rebirth of the American City** United States. Congress. House. Committee on Banking, Currency, and Housing,1976 **The Urban Wilderness** Sam Bass Warner,1995-01-01 Warner is in some ways almost unique among urban historians in the ways in which he has linked visual and cultural representations with socioeconomic analysis The strength of *The Urban Wilderness* is its scope and reach and the author's willingness to take risks intellectually This book is a work of passion and engagement Margaret Marsh author of *Suburban Lives* **U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973** United States. Environmental Protection Agency. Library Systems Branch,1974 Governing the Island of Montreal Andrew Sancton,2023-04-28 Located at the junction of the St Lawrence and Ottawa rivers Montreal Island is the main contact point between French and English Canadians Prior to Quebec's Quiet Revolution of the 1960s local governments in Montreal both reflected and perpetuated the mutual isolation of French and English Residential concentration in autonomous suburbs together with self contained networks of schools and social services enabled English speaking Montrealers to control the city's economy and to conduct their community's affairs with little regard for the French speaking majority The modernization of the Quebec state in the 1960s dramatically challenged this arrangement The author demonstrates how the English speaking politicians in cooperation with certain French speaking allies have succeeded in preventing the wholesale adoption of ambitious schemes for metropolitan reorganization He describes the workings of a society divided by language and ethnicity where the pervasiveness of the politics of language impedes all plans for comprehensive metropolitan reform This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 *The Future Role of University-based Metropolitan Medical Centers* ,1972 **The Democratic Class Struggle** Walter Korpi,2018-12-07 First published in 1983 This book combines a case study of class relations politics and voting in Sweden with a comparative analysis of distributive conflicts and politics in eighteen OECD countries Its underlying theoretical theme is the development of class relations in free enterprise or capitalise democracies This title will be of interest to students of history and politics *Technical Studies* United States.
