Douglas-Scott, 2014-07-18 How can we characterise law and legal theory in the twenty first century Law After Modernity argues that we live in an age after Modernity and that legal theory must take account of this fact The book presents a dynamic analysis of law which focusses on the richness and pluralism of law on its historical embeddedness its cultural contingencies as well as acknowledging contemporary law s global and transnational dimensions However Law After Modernity also warns that the complexity fragmentation pluralism and globalisation of contemporary law may all too easily perpetuate injustice In this respect the book departs from many postmodern and pluralist accounts of law Indeed it asserts that the quest for justice becomes a crucial issue for law in the era of legal pluralism and it investigates how it may be achieved The approach is fresh contextual and interdisciplinary and unusually for a legal theory work is illustrated

throughout with works of art and visual representations which serve to re enforce the messages of the book

Interdisciplinarity and Social Justice Joe Parker, Ranu Samantrai, Mary Romero, 2012-02-01 In the 1960s and 1970s activists who focused on the academy as a key site for fostering social change began by querying the assumptions of the traditional disciplines and transforming their curricula putting into place women's and ethnic studies programs that changed both the subject and methods of scholarship. The pattern of scholars and activists joining forces to open fields of research and teaching continued in subsequent decades and recent additions including critical race studies, queer studies, cultural studies and postcolonial studies take as their epistemological foundation the inherently political nature of all knowledge production. Interdisciplinarity and Social Justice seizes this opportune moment in the history of interdisciplinary fields to review their effects on our intellectual and political landscape to evaluate their ability to deliver promised social benefits and to consider their futures. The essays collected in this volume detail histories of the interdisciplinary fields that emerged from social movements, examine how effectively they have achieved their goals of intellectual and social change and consider the challenges they now face inside and outside the academy.

Dissident Writings of Arab Women Brinda J. Mehta, 2014-03-14 Dissident Writings of Arab Women: Voices Against Violence analyzes the links between creative dissidence and inscriptions of violence in the writings of a selected group of postcolonial Arab women. The female authors destabilize essentialist framings of Arab identity through a series of reflective interrogations and contesting literary genres that include novels, short stories, poetry, docudramas, interviews and testimonials. Rejecting a purist literature for literature's sake ethic, they embrace a dissident poetics of feminist critique and creative resistance as they engage in multiple and intergenerational border crossings in terms of geography, subject matter, language and transnationality. This book thus examines the ways in which the women's writings provide the blueprint for social justice by voicing protest and stimulating critical thought, particularly in instances of social oppression, structural violence and political transition. Providing an interdisciplinary approach which goes beyond narrow definitions of literature as aesthetic praxis to include literature's added value as a social, historical, political and cultural palimpsest, this book will be a useful resource for students and scholars of North African Studies, Postcolonial Studies, Francophone Studies and Feminist Studies.

Arab Representations of the Occident Rasheed El-Enany, 2006-04-18 This is one of the first books in English to explore Arab responses to Western culture and values in modern Arab literature. Through in-depth research, El-Enany examines the attitudes as expressed mainly through works of fiction written by Arab authors during the twentieth and to a lesser extent nineteenth century. It constitutes an original addition to the age-old East-West debate and is particularly relevant to the current discussion on Islam and the West. Alongside raising highly topical questions about stereotypical ideas concerning Arabs and Muslims in general, the book explores representations of the West by the foremost Arab intellectuals over a two-century period up to the present day and will appeal to those with an interest in Islam, the Middle East, nationalism and the so-called Clash of Civilizations.
