Wang, John

New Concepts For Parallel Objectrelational Query Procebing:

New Concepts for Parallel Object-Relational Query Processing Michael Jaedicke, 2003-06-30 During the last few years parallel object relational database management systems have emerged as the leading data management technology on the market These systems are extensible by user defined data types and user defined functionality for the data This work focuses on the efficient parallel execution of user defined functionality The main contributions describe techniques to support data parallelism for user defined scalar and aggregate functions and intra function parallelism for the execution of a scalar function on a large object and a new technology to provide extensibility with regard to new set oriented database operations that can efficiently implement user defined functionality in parallel object relational database management systems

High-Performance Parallel Database Processing and Grid Databases David Taniar, Clement H. C. Leung, Wenny Rahayu, Sushant Goel, 2008-09-17 The latest techniques and principles of parallel and grid database processing The growth in grid databases coupled with the utility of parallel query processing presents an important opportunity to understand and utilize high performance parallel database processing within a major database management system DBMS This important new book provides readers with a fundamental understanding of parallelism in data intensive applications and demonstrates how to develop faster capabilities to support them It presents a balanced treatment of the theoretical and practical aspects of high performance databases to demonstrate how parallel query is executed in a DBMS including concepts algorithms analytical models and grid transactions High Performance Parallel Database Processing and Grid Databases serves as a valuable resource for researchers working in parallel databases and for practitioners interested in building a high performance database It is also a much needed self contained textbook for database courses at the advanced undergraduate and graduate levels

Data Management in a Connected World Hartmut Wedekind, Theo Härder, 2005-07-04 The role of data management becomes more and more crucial in a totally connected world Having the right data at the right time at the right place is therefore one of the most challenging research issues we face in the coming years This Festschrift volume is devoted to Hartmut Wedekind on the occasion of his 70th birthday and comprises a total of 18 articles discussing a broad spectrum of issues related to data management All articles are co authored by academic children and grandchildren of Hartmut Wedekind and therefore reflect the multifaceted selection of academic topics that he explored discussed and published on during his academic life All articles are clustered into four different parts focusing on motivation and modeling issues infrastructural services application design and finally different applications The scope of the articles reaches from visionary illustrations of data management in a connected world through core database techniques in the context of database caching notification services etc to the design and description of data intensive applications
