Heathcote, D. Otto, 2014-09-01 This book examines how the Security Council has approached issues of gender equality since 2000 Written by academics activists and practitioners the book challenges the reader to consider how women s participation gender equality sexual violence and the prevalence of economic disadvantages might be addressed in post conflict communities Peace on Bougainville Rebecca Adams, 2001 This is a unique look at the country of Bougainville its people their history and their move toward peace told from the perspectives of the people involved both within and outside of the process The book traces the peace movement from November 20 1997 when unarmed monitors from New Zealand Australia Vanuatu and Fiji arrived in Bougainville with the agreement of the Papua New Guinea government and most of the political factions on Bougainville Their task was to establish a secure atmosphere in which Bougainvilleans could forge their own peaceful solution to the conflict The individual viewpoints show how the fragile road toward a peaceful outcome was constructed Settling Self-Determination Disputes Marc Weller, Barbara Metzger, 2008-01-31 The study is the result of an international collaborative project supported and funded by the Carnegie Corporation of New York This multi year venture has involved a research team of some forty chapter authors and commentators The research has been accompanied by three major workshops on project methodology initial chapter reviews and final discussions A point was made of including both scholars and practitioners involved in power sharing settlements in the review process in the hope that more would be learned about the actual implementation of the settlements under investigation The project team was united in its wish to explore whether long standing secessionist

conflicts have been addressed effectively through the significant number of self determination settlements that were generated in response to the wave of internal conflicts of the 1990s It was also committed to testing whether consociationalist and integrative techniques of conflict settlement really are as mutually exclusive as is sometimes supposed or whether they can in fact be mutually reinforcing Finally the project derives its impetus from the necessity to critically rethink the doctrine of self determination One may question whether its traditional restrictive interpretation will be adequate in confronting the wide variety of future challenges to the territorial integrity of states

Constitution Making during State Building Joanne Wallis, 2014-09-15 How can fragmented divided societies that are not immediately compatible with centralised statehood best adjust to state structures This book employs both comparative constitutional law and comparative politics as it proposes the idea of a constituent process whereby public participation in constitution making plays a positive role in state building This can help to foster a sense of political community and produce a constitution that enhances the legitimacy and effectiveness of state institutions because a liberal local hybrid can emerge to balance international liberal practices with local customary ones This book represents a sustained attempt to examine the role that public participation has played during state building and the consequences it has had for the performance of the state It is also the first attempt to conduct a detailed empirical study of the role played by the liberal local hybrid approach in state building

Fighting Over Peace Andrew G. Reiter, 2016-09-19 This book presents post peace agreement violence as a serious yet predictable and manageable political phenomenon Negotiating an end to a civil war is extremely difficult and many signed peace agreements subsequently unravel ushering in renewed conflict In response important international actors have become increasingly involved in conflict mediation peacekeeping and post conflict reconstruction around the globe Policymakers and scholars alike have identified spoilers violent actors who often rise up and attempt to challenge or derail the peace process as one of the greatest threats to peace Using a mixed method approach combining quantitative and qualitative analyses of a newly created global dataset of spoiling Reiter demonstrates that this type of violence occurs in predictable circumstances and only represents a threat to peace under specific conditions The book also shows that spoiling often serves to bring agreement flaws and implementation failures to light and in turn forces actors to recommit to an accord thereby strengthening peace in the long term

Arbitration and Renegotiation of International Investment Agreements: A Study with Particular Reference to Means of Conflict Avoidance Under Natural Resources Investment Agreements Wolfgang Peter, Jean-Quentin de Kuyper, Bénédicte de Candolle, 1995-06-08 This book is a second revised edition of the original 1986 publication Since then the issue of contract change has increasingly challenged the business community and legal practitioners The world wide recession may well have accelerated the need to secure contractual relationships by reasonable flexibility Successful foreign investment a relentless challenge is subject to many unpredictable errors Of all these variables however successful investment is most dependent on the investor host country relationship which is the object of the present study In particular

the pressure by host countries for contract change and its counterpart the investor's defence of contract stability The book is essentially a reference handbook for legal practitioners It analyzes a variety of increasingly important questions concerning international investment agreements that come under pressure for change by one of the contracting parties either a transnational corporation or a host country government The seven case studies and the analytical chapters which follow are based on the author's research and the assistance of corporate and government officials experts from the United Nations and other organizations and members of academic research institutes
