Brandt, Stephen P.

Maran, 1972-01-01 How did the universe originate and how did it reach its present state What formed the earth and how did life arise These are among the central questions that have concerned every human culture and they obviously involve events buried in the distant past How can we progress in understanding so as to choose among the various theories for the origin of the universe or possibly formulate a better theory This process of exploration is what we call astronomy and the final purpose of astronomy is thus nothing less than to account for the origin and physical nature of the universe around us *New Horizons in Astronomy* [by] John C. Brandt John C. Brandt, 1972 **The Irish Astronomical Journal**, 1998 *New Worlds, New Horizons* National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on the Review of Progress Toward the Decadal Survey Vision in New Worlds, *New Horizons in Astronomy and Astrophysics*, 2016-10-24 New Worlds New Horizons in Astronomy and Astrophysics NWNH the report of the 2010 decadal survey of astronomy and astrophysics put forward a vision for a decade of transformative exploration at the frontiers of astrophysics This vision included mapping the first stars and galaxies as they emerge from the collapse of dark matter and cold clumps of hydrogen finding new worlds in a startlingly diverse population of extrasolar planets and exploiting the vastness and extreme conditions of the universe to reveal new information about the fundamental laws of nature NWNH outlined a compelling program for understanding the cosmic order and for opening new fields of inquiry through the discovery areas of gravitational waves time domain astronomy and habitable planets Many of these discoveries are likely to be enabled by cyber discovery and the power of mathematics physics and imagination To help realize this vision NWNH recommended a suite of innovative and powerful facilities along with balanced strong support for the scientific community engaged in theory data analysis technology development and measurements with existing and new instrumentation Already in the first half of the decade scientists and teams of scientists working with these cutting edge instruments and with new capabilities in data collection and analysis have made spectacular discoveries that advance the NWNH vision New Worlds New Horizons A Midterm Assessment reviews the responses of NASA

s Astrophysics program NSF s Astronomy program and DOE s Cosmic Frontiers program to NWNH This report describes the most significant scientific discoveries technical advances and relevant programmatic changes in astronomy and astrophysics over the years since the publication of the decadal survey and assesses how well the Agencies programs address the strategies goals and priorities outlined in the 2010 decadal survey *New Worlds, New Horizons in Astronomy and Astrophysics*, 2010 New Horizons in Astronomy Fred Lawrence Whipple, 1956 **Horizons** Michael A.
