New Directions In Psychology 4:

New directions in psychology 4 [etc.], etc, 1970 *New Directions In Behavioral Pricing* Chezy Ofir, 2024-05-21

Behavioral pricing research is viewed as central to academic marketing research as well as strategic pricing. The objective of this book is to introduce new research directions in Behavioral Pricing. It investigates how consumers perceive, evaluate, and integrate prices with other factors to make value, fairness judgments, and product and brand choices. Encompassing customer price-related attitudes, knowledge, cognitive processes, and behaviors, the book seeks to predict and explain customers' reactions to price strategies and associated psychological, physiological, and emotional processes. **The Global Context**

for New Directions for Child and Adolescent Development Elena L. Grigorenko, 2015-02-27. Take an in-depth look at the field of child and adolescent development. In this issue, the new leadership of this series offers different aspects of relevant work throughout multiple disciplines and continents, capturing both the variability and the richness of the themes considered and topics investigated in the field of childhood and adolescence. It answers: What are some of the new directions in the developmental sciences of childhood and adolescence? Where will the field be within the next decade or so? How do those who practice in the field's different corners see its trajectory? This is the 147th volume in this Jossey-Bass series *New Directions for Child and Adolescent Development*. Its mission is to provide scientific and scholarly presentations on cutting-edge issues and concepts in this subject area. Each volume focuses on a specific new direction or research topic and is edited by experts from that field. *New Directions in the Philosophy of Memory* Kourken Michaelian, Dorothea Debus, Denis

Perrin, 2018-04-27. Although philosophers have explored memory since antiquity, recent years have seen the birth of philosophy of memory as a distinct field. This book, the first of its kind, charts emerging directions of research in the field. The book's seventeen newly commissioned chapters develop novel theories of remembering and forgetting, analyze the phenomenology and content of memory, debate issues in the ethics and epistemology of remembering, and explore the relationship between memory and affectivity. Written by leading researchers in the philosophy of memory, the chapters collectively present an exciting vision of the future of this dynamic area of research. **New Directions in Treatment, Education, and Outreach for Mental Health and Addiction** Thalia MacMillan, Amanda Sisselman-Borgia, 2018-02-20. This

practice-enhancing volume assembles the latest innovative thinking on working with clients who have both mental health diagnoses and substance use disorders. Diagnosis is a central focus of the coverage, untangling the often knotty considerations surrounding dual diagnosis and the complex issues surrounding treatment, even in frequently seen combinations, e.g., depression, alcohol abuse. The section on practice emphasizes meeting patients where they are and making use of their community, cultural, and spiritual contexts in crafting interventions. And the book's ambitious chapters on professional development describe training programs with the potential to produce the next generation of responsive, knowledgeable, and flexible therapists. Among the topics covered: Comprehensive assessment of substance abuse and

addiction risk in adolescents The relationship between attachment and addiction Addiction in the community the role of emergency services Substance use during and after major crisis and disaster a practitioner s guide Practice advocacy and outreach perspectives on addiction services Teaching the importance of developing the therapeutic relationship New Directions in Treatment Education and Outreach for Mental Health and Addiction equips health and clinical psychologists social workers and addiction counselors and educators with a well rounded understanding of a growing population and a wealth of perspectives on effective new interventions New Directions in the Future of Work Mónica Santana,Ramón Valle-Cabrera,2021-11-05 New Directions in the Future of Work explores vital research and industrial issues that are central to understanding the concepts of the Future of Work and address key challenges in this evolving area of debate Really New Directions in Evaluation: Young Evaluators' Perspectives Sandra Mathison,2011-10-18 From the Editor This issue of New Directions for Evaluation NDE marks a milestone the 25th anniversary of the American Evaluation Association AEA NDE is an official publication of AEA and has been a crucial means for the Association to foster and promote the professionalization of evaluation through thematic discussions of theory and practice in evaluation NDE was first published in 1978 under the name New Directions for Program Evaluation although the title became New Directions for Evaluation in 1995 in acknowledgment of the broader scope of evaluation The current issue of NDE on the 25th anniversary of AEA looks not back but ahead Because NDE is a thematic and guest edited journal it tends to favor more mature self assured voices in evaluation The journal format does not lend itself easily to showcasing the voices of novice evaluators those just entering the field and who will be the next generation of evaluation practitioners and theoreticians As such NDE has chosen on this anniversary to highlight those voices Included are a number of chapters that build on what evaluation has already learned from other disciplines by introducing us to new possibilities We are also challenged in the chapters to think about techniques or methods we use both at a practical and conceptual level Some chapters raise questions about who evaluators are how they interact with others and the roles they assume in their practice Some young evaluators are confronting in various ways conundrums in thinking about and doing evaluation within organizations either from an external or internal perspective And issues in using technology in evaluation or challenges in evaluating technology are considered **New Directions in Forensic Psychology: Applying Neuropsychology, Biomarkers and Technology in Assessment & Intervention** Joan E. Van Horn,Josanne van Dongen,Yvonne H. A. Bouman,Märta Wallinius ,Patrice Renaud,2024-10-23 New trends in research assessment and treatment are currently visible in the forensic field in three relatively separate areas the use of neuropsychology biomarkers and wearables and VR technology in forensic mental health These areas individually can make a valuable contribution to improving forensic assessments and treatment but combined they might even have a greater impact For example heart rate variability a biomarker can be visualized during Virtual Reality VR scenarios to increase patients insights into their physiological responses With our topic New Directions in Forensic Psychology Applying Neuropsychology

Biomarkers and Technology in Assessment and Intervention we hope to offer more insight into the state of scientific developments in the aforementioned areas as they relate to forensic psychology As a result we hope to be able to pinpoint lacking knowledge and offer suggestions for further research
