The Appearance of Equality Christophe M. Burke, 1999-06-30 An examination of the language of law in the area of political representation this book considers the development and recognition of group claims brought pursuant to the Voting Rights Act and the Equal Protection Clause in Supreme Court opinions In his analysis Burke highlights the different discursive strategies broadly identified as liberal and communitarian used by the Supreme Court to justify the outcomes of various cases and he argues that no particular strategy of justification is inherently politically conservative or liberal and that no conception of political representation is unassailable Therefore it is unlikely that the Supreme Court will articulate a stable measure of fair representation The Supreme Court offers one more forum in the deliberation over what is fair representation however it is not likely to provide minority communities with a legal answer to the problem of political underrepresentation As such this book tells the uncertain story of the creation of political fairness by the Supreme Court The language used to characterize what is fair and representative and the theoretical designs which the rhetoric reflects allows us to formulate concepts of fair representation as legal standards evolve By placing the debate over fair representation in not only political and legal but also philosophical terms we are better able to understand the inevitable tensions that drive the concept of representation into new ill defined and contentious areas
