Peter I. Hajnal, Peter Hajnal

New Great Power Coalition Toward A World Concert Of Nations:

The New Great Power Coalition Richard N. Rosecrance, 2001 The Great Power coalition of the early 19th century succeeded in keeping the peace among the major states of England France Prussia Russia and Austria For the last century and a half however no truly encompassing coalition has emerged and in its absence the 20th century was plagued by world wars and peripheral conflicts Only now at the outset of the 21st century is a new Great Power coalition possible This book examines the prospect of a Great Power coalition that would be sustained by the development of overlapping international clubs The new set of Great Powers the United States Japan the European Union China and Russia can be increasingly bound together through a combination of status and economic incentives international norms and regimes and the emulation of national and regional best practices The construction of such a coalition presents special problems and opportunities for the United States In the years ahead America will need to adjust its policies to bring China and Russia into membership of such a group or see them progressively adopt recalcitrant and antagonistic attitudes toward world affairs

Emerging Powers in Global Governance Andrew F. Cooper, Agata Antkiewicz, 2010-10-30 The early twenty first century has seen the beginning of a considerable shift in the global balance of power Major international governance challenges can no longer be addressed without the ongoing co operation of the large countries of the global South Brazil Russia India China South Africa ASEAN states and Mexico wield great influence in the macro economic foundations upon which rest the global political economy and institutional architecture It remains to be seen how the size of the emerging powers translates into the ability to shape the international system to their own will In this book leading international relations experts examine the positions and roles of key emerging countries in the potential transformation of the G8 and the prospects for their deeper engagement in international governance The essays consider a number of overlapping perspectives on the G8 Heiligendamm Process a co

The Oxford Handbook of Global Policy and Transnational Administration Diane Stone,Kim Moloney,2019-01-10 Global policy making is unfurling in distinctive ways above traditional nation state policy processes New practices of transnational administration are emerging inside international organizations but also alongside the trans governmental networks of regulators and inside global public private partnerships Mainstream policy and public administration studies have tended to

analyse the capacity of public sector hierarchies to globalize national policies By contrast this Handbook investigates new public spaces of transnational policy making the design and delivery of global public goods and services and the interdependent roles of transnational administrators who move between business bodies government agencies international organizations and professional associations This Handbook is novel in taking the concepts and theories of public administration and policy studies to get inside the black box of global governance Transnational administration is a multi actor and multi scalar endeavour having manifestations depending on the policy issue or problems at the local urban sub regional sub national regional national supranational supra regional transnational international and global scales These scales of local and global are not neatly bounded and nested spaces but are articulated together in complex patterns of policy activity These transnational patterns represent a reinvigoration of public administration and policy studies as the Handbook authors advance their analysis beyond the methodological nationalism of the nation state

G20 Governance for a Globalized World John J. Kirton, 2016-04-15 This book offers the most thorough detailed inside story of the preparation negotiation performance and achievements of G20 gatherings from their start at the finance level in 1999 through their rise to become leader level summits in response to the great global financial crisis in 2008 Follow the moves of America's George Bush and Barack Obama Britain's Gordon Brown and David Cameron Canada's Stephen Harper Germany's Angela Merkel and other key leaders as they struggle to contain the worst global recession since the Great Depression of the 1930s This book provides a full chapter long account of each of the first four G20 summits from Washington to Toronto with summaries of the ensuing summits It uses international relations theory to build and apply a model of systemic hub governance to back its central claim to show convincingly that G20 performance has grown to successfully govern an increasingly interconnected complex crisis ridden globalized twenty first century world
