Pediatric Oncology 1:

Pediatric Oncology 1 G. Bennett Humphrey, Louis P. Dehner, Gerald B. Grindey, Ronald T. Acton, 2012-12-06 Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good in-depth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more

Pediatric Oncology Nursing Deborah Tomlinson, Nancy E. Kline, 2005-07-09 This comprehensive clinical handbook for nurses in paediatric haematology oncology contains in depth information regarding pathophysiology diagnosis treatment advanced assessment and interventions Integrative Pediatric Oncology Alfred Längler, Patrick J. Mansky, Georg Seifert, 2012-12-13 This book covers a broad spectrum of complementary and alternative medicine CAM practices employed in pediatric oncology worldwide with a special focus on the methods widely used in Western countries It is a scientifically based practice oriented handbook that will meet the needs of pediatric oncologists working in medical practices and hospitals An introductory section includes a comparative overview of current CAM use in pediatric oncology in different countries Commonly used CAM methods are then discussed in a series of chapters that provide a theoretical description of the method in question followed by more practically oriented information including scientific data if applicable Special attention is paid to the issue of how to integrate each method into conventional pediatric oncology The closing parts of the book consider aspects of CAM requiring further development such as institutional research and provide a road map on establishing integrative pediatric oncology worldwide **Pediatric Oncology Nursing** Pamela S. Hinds, Lauri

Linder, 2020-01-23 This book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework The spectrum of topics covered is wide including for example symptom management self care management exercise and physical activity family centered care palliative care the role of the nurse in treatment decision making patient and nurse resiliency

survivorship and genetic counseling Throughout there is a focus on the implications of research for nursing practice highlighting which elements of the available evidence are ready for translation into practice and which are not In addition careful attention is paid to the role that nursing can play in further advancing science through clinical research The authors are leading experts from across the globe The book will be of special interest for pediatric oncology nurses including direct care nurses research nurses and nursing leaders and will also be a stimulating source for researchers and non oncology nurses
