Handbook of Career Development Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, A. G. Watts, 2014-02-08 This book is focused on work occupation and career development themes that are fundamental to a wide range of human activities and relevant across all cultures Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous An examination of the literature pertaining to career development counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies some of the largest workforces in the world are in the developing world Career guidance is rapidly emerging as a strongly felt need in these contexts If more relevant models are to be developed frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development This does not mean that existing ideas are to be discarded Instead an integrative approach that blends universal principles with particular needs could offer a framework for theorizing research and practice that has wider relevance The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling

*The Changing Landscape of Youth Work* Kristen M. Pozzoboni, Ben Kirshner, 2016-07-01 The purpose of this book is to compile and publicize the best current thinking about training and professional development for youth workers School age youth spend far more of their time outside of school than inside of school The United States boasts a rich and vibrant ecosystem of Out of School Time programs and funders ranging from grassroots neighborhood centers to national Boys and Girls Clubs The research community too has produced some scientific consensus about defining features of high quality youth development settings and the importance of after school and informal programs for youth But we know far less about the people who provide support guidance and mentoring to youth in these settings What do youth workers do What kinds of training certification and job security do they have Unlike K 12 classroom teaching a profession with longstanding if contested legitimacy and recognition youth work does not call forth familiar imagery or cultural narratives Ask someone what a youth worker does and they are just as likely to think you are talking about a young person working at her first job as they are to think you mean a young adult who works with youth This absence of shared archetypes or mental models is matched by a shortage of policies or professional associations that clearly define youth work and assume responsibility for training

and preparation This is a problem because the functions performed by youth workers outside of school are critical for positive youth development especially in our current context governed by widening income inequality The US has seen a decline in social mobility and an increase in income inequality and racial segregation This places a greater premium on the role of OST programs in supporting access and equity to learning opportunities for children particularly for those growing up in neighborhoods of concentrated poverty Fortunately in the past decade there has been an emergence of research and policy arguments about the importance of naming defining and attending to the profession of youth work A report released in 2013 by the DC Children and Youth Investment Corporation suggests employment opportunities for youth workers are growing faster than the national average and as the workforce increases so will efforts to professionalize it through specialized training and credentials Our purpose in this volume is to build on that momentum by bringing together the best scholarship and policy ideas coming from in and outside of higher education about conceptions of youth work and optimal types of preparation and professional development
