The Rational Foundations of Economic Behaviour Kenneth Joseph Arrow, 1996 **Collected Papers** Robert J. A. Hayek, 2017-06-15 F A Hayek 1899 1992 was one of the leading voices in economic and social theory but he also wrote on theoretical psychology including in the landmark book *The Sensory Order* Although *The Sensory Order* was not widely engaged with by either psychologists or social scientists at the time of publication it is seen today as essential for fully understanding Hayek's more well known work The latest addition to the University of Chicago Press's Collected Works of F A Hayek series *The Sensory Order and Other Writings on the Foundations of Theoretical Psychology*

pairs the book originally published in 1952 with additional essays related to The Sensory Order's key themes including a student paper from 1920 in which Hayek outlined the basic ideas he fully developed in the 1952 book Rounding out the volume is an insightful introduction by editor Viktor Vanberg that sketches out the central problems Hayek was grappling with when he wrote The Sensory Order and the influential role this early thinking on theoretical psychology would play over the next six decades of his career The book also features ample footnotes and citations for further reading making this an essential contribution to the series *The State of Economics, the State of the World* Kaushik Basu, David Rosenblatt, Claudia Sepulveda, 2025-02-04

Leading economists address the ongoing challenges to economics in theory and practice in a time of political and economic crises More than a decade of financial crises sovereign debt problems political conflict and rising xenophobia and protectionism has left the global economy unsettled and the ability of economics as a discipline to account for episodes of volatility uncertain In this book leading economists consider the state of their discipline in a world of ongoing economic and political crises The book begins with three sweeping essays by Nobel laureates Kenneth Arrow in one of his last published works Amartya Sen and Joseph Stiglitz that offer a summary of the theoretical foundations of modern economics the twin pillars of general equilibrium theory and welfare economics Contributors then turn to macroeconomic stabilization and growth and finally new areas of research that depart from traditional theory methodology and concerns climate change behavioral economics and evolutionary game theory The 2019 Nobel Prize laureates Abhijit Banerjee Esther Duflo and Michael Kremer contribute a paper on the use of randomized control trials in development economics *Rational Choice and Politics* Stephen Parsons, 2005-03-16

Rational Choice Theory claims to be able to explain how all individuals make not just some of their choices but all of their choices all of the time According to the theory there is no difference in principle between choosing whether to buy apples rather than bananas or choosing whether to join a political revolution instead of staying at home and watching television Given these claims to universal applicability it is perhaps not surprising to find that over the last three or four decades Rational Choice Theory has become increasingly influential as a means of providing explanations in politics The textbook introduces the premises of Rational Choice Theory and illustrates how this theory can be applied to political studies The book concludes with an assessment of the usefulness of the model in the light of the problems highlighted Parson's book provides a lucid presentation and a cogent critique of Rational Choice Theory in economics and politics Professor Steve Pressman Department of Economics and Finance Monmouth University USA *New Approaches to the Economics of Plant Health* Alfons Oude Lansink, 2007-04-17

The world trade of plants and plant products is gradually increasing in both quantity and variety Also as more and more citizens are nowadays travelling to distant destinations there is an increased risk of unintentionally importing harmful organisms and invasive species Governments respond to increased phytosanitary risks by imposing trade restricting measures However they are under increasing pressure of the private sector and the World Trade Organization to justify costly and trade restricting

phytosanitary policies On the other side current phytosanitary policies are required to account for impacts on the environment This book presents a number of recent scientific developments regarding the economic analysis of impacts that harmful organisms have on agriculture and the environment and of measures to control these organisms It also contains a number of new approaches that integrate economic and epidemiological modelling and economic approaches for measuring these impacts

Evolution and Design of Institutions Christian Schubert, Georg Von Wangenheim, 2006-09-27 This book comprises nine papers approaching designed institutions and their interplay with spontaneous institutions from various angles While the evolution of spontaneous institutions is quite well understood in economic thinking the development of consciously designed institutions has been examined much less In new institutional economics public choice and law and economics the interaction between changing preferences and spontaneously evolving institutions on the one hand and the evolution of designed institutions as e g legal systems on the other hand has largely been ignored A number of top class international contributors have been assembled to study this phenomenon including Viktor Vanberg Bruno Frey Elinor Ostrom and Francesco Parisi

Exotic Preferences George Loewenstein, 2007-08-02 George Loewenstein analyses how individual preferences are formed whether they can be predicted and the extent to which they are influenced by emotion rather than reason These writings include the author's most influential papers on this intriguing topic

Organizational Routines Meet Experimental Psychology Maximilian Eberl, 2018-09-03 Using an experimental approach Maximilian Eberl evaluates the role of implicit learning CBM AAT for the modification of organizational routines Taking a vertical perspective on the collective entities in organizations shows an increasing role of impulsive processes the lower the level gets The horizontal perspective demonstrates the potential of implicit learning for the replication of routines Finally the time perspective highlights the contributions of implicit learning strategies for change in and of routines as well as the contributions of implicit learning to deal with the path dependence of routines

Rationality Concepts in Environmental Valuation Oliver Frör, 2007 Survey based valuation techniques like the Contingent Valuation Method CVM rely particularly on

the premise of respondents rationality when answering willingness to pay WTP questions Results of CVM surveys have repeatedly put this fundamental assumption into question This study adopts a more realistic view of rationality accounting for respondents limited capacities to process information Based on cognitive psychology a technique to detect and analyze the bounds of rationality inherent in WTP statements is developed Using an empirical example the influence of bounded rationality on the validity of CVM results is analyzed It is shown that individual differences in information processing play a major role From these results recommendations for future survey design are developed *Darwinism and Economics* Geoffrey Martin Hodgson,2009 Discusses how Darwinism affects our conception of human nature and challenges long standing assumptions such as self interested behaviour This work offers an analysis of the nature of socio cultural evolution its differences from biological evolution and whether it is Lamarckian *Journal of Economic Literature* ,2006 **The Cumulative Book Index** ,1997 A world list of books in the English language **Index of Conference Proceedings** British Library.
