What Are Poets For?
 Gerald L Bruns, 2012-06 Conceptions and practices of poetry change not only from time to time and from place to place but also from poet to poet This has never been more the case than in recent years Gerald Bruns's magisterial What Are Poets For explores typographical experiments that distribute letters randomly across a printed page sound tracks made of vocal and buccal noises and holographic poems that recompose themselves as one travels through their digital space Bruns surveys one word poems found texts and book length assemblies of disconnected phrases he even includes descriptions of poems that no one could possibly write but which are no less interesting or no less poetic for all of that The purpose of the book is to illuminate this strange poetic landscape spotlighting and describing such oddities as they appear anomalies that most contemporary poetry criticism ignores Naturally this breadth raises numerous philosophical questions that Bruns also addresses for example whether poetry should be responsible semantically ethically politically to anything outside itself whether it can be reduced to categories distinctions and the rule of identity and whether a particular poem can seem odd or strange when everything is an anomaly Perhaps our task is simply to learn like anthropologists how to inhabit such an anarchic world The poets taken up for study are among the most important and innovative in the late twentieth and early twenty first centuries John Ashbery Charles Bernstein Paul Celan Kenneth Goldsmith Lyn Hejinian Susan Howe Karen Mac Cormack Steve McCaffery John Matthias J H Prynne and Tom Raworth What Are Poets For is nothing less than a lucid detailed study of some of the most intractable writings in contemporary poetry

today Individual chapters present a range of methodological approaches to understanding national culture and creative labour in global contexts Through their collective enactment of methodological crosstalk they demonstrate the productivity of scholarly debate across differences of outlook culture and training In highlighting convergences and disagreements the book sharpens our understanding of how literary and critical conventions and theories operate within and across cultures

Mark Smith, 2013 A look at experiment and continuity in North American poetry since the 1960s **Trash Culture** Gillian Pye, 2010 In the late twentieth and early twenty first centuries concerns about the environment and the future of global capitalism have dominated political and social agendas worldwide The culture of excess underlying these concerns is particularly evident in the issue of trash which for environmentalists has been a negative category heavily implicated in the destruction of the natural world However in the context of the arts trash has long been seen as a rich aesthetic resource and more recently particularly under the influence of anthropology and archaeology it has been explored as a form of material culture that articulates modes of identity construction In the context of such shifting often ambiguous attitudes to the obsolete and the discarded this book offers a timely insight into their significance for representations of social and personal identity The essays in the book build on scholarship in cultural theory sociology and anthropology that suggests that social and personal experience is embedded in

material culture but they also focus on the significance of trash as an aesthetic resource The volume illuminates some of the ways in which our relationship to trash has influenced and is influenced by cultural products including art architecture literature film and museum culture **Dooble Tongue** Jeffrey Skoblow, 2001 Dooble Tongue is an imaginative meditation on Robert Burns and Scottish poetry as well as a book that engages and contests the customary assumptions and practices of literary criticism Beginning with an examination of two contemporary Scottish poets W N Herbert and Robert Crawford and moving back in time to the Scottish Modernist master Hugh MacDiarmid then further back to Burns himself the study of the Scottish tradition is situated in a broad historical context The focus throughout is on language particularly Scots more broadly vernacular literature in relation to culturally elite literary and critical modes as well as on questions of literary nationalism and the cultural politics of poetic discourse
