Rational Mysticism John Horgan, 2004-03-22 The author of The End of Science chronicles the most advanced research into such experiences as prayer fasting and trances in this great read The Washington Post How do trances visions prayer satori and other mystical experiences work What induces and defines them Is there a scientific explanation for religious mysteries and transcendent meditation John Horgan investigates a wide range of fields chemistry neuroscience psychology anthropology theology and more to narrow the gap between reason and mystical phenomena As both a seeker and an award winning journalist Horgan consulted a wide range of experts including theologian Huston Smith spiritual heir to Joseph Campbell Andrew Newberg the scientist whose guest for the God module was the focus of a Newsweek cover story Ken Wilber prominent transpersonal psychologist Alexander Shulgin legendary psychedelic drug chemist and Susan Blackmore Oxford educated psychologist parapsychology debunker and Zen practitioner Horgan explores the striking similarities between mystical technologies like sensory deprivation prayer fasting trance dancing meditation and drug trips He participates in experiments that seek the neurological underpinnings of mystical experiences And finally he recounts his own search for enlightenment adventurous poignant and sometimes surprisingly comic Horgan's conclusions resonate with the controversial climax of The End of Science because as he argues the most enlightened mystics and the most enlightened scientists end up in the same place confronting the imponderable depth of the universe Medjugorje and the **Supernatural** Daniel Maria Klimek, 2018-03-01 In June 1981 six young Croatians in the village of Medjugorje in the former Yugoslavia reported that the Virgin Mary had appeared to them The Medjugorje visionaries say that Mary has returned every day since then bringing them important messages from heaven to convey to the world Throughout history people have reported encountering extraordinary religious experiences apparitions of the Virgin Mary visions of Jesus Christ weeping statues and icons the stigmata physical healings and miracles and experiences of the afterlife and interpreted them as supernatural in origin Scholars have often tried to reinterpret such experiences including those described by the great mystics like Francis of Assisi Catherine of Siena and Teresa of Avila into natural or psychopathological categories such as hysteria hallucination delusion epileptic seizures psychosis the workings of the unconscious mind or fraud Are such reductionist explanations valid Over the past three decades the Medjugorje visionaries have been subjected to extensive medical psychological and scientific examination even while undergoing their visionary experiences Daniel Klimek argues that the case of Medjugorje affords a rare opportunity to understand a deeper dimension of extraordinary religious phenomena Presenting and analyzing the scientific studies on the visionaries in juxtaposition with the major scholars and debates surrounding religious experience Klimek concludes that a multidisciplinary approach grants a more holistic and

deeper understanding of such extraordinary religious experiences The Atheist's Primer Malcolm Murray, 2010-04-06 The Athiest's Primer is a concise but wide ranging introduction to a variety of arguments concepts and issues pertaining to belief in God In lucid and engaging prose Malcom Murray offers a penetrating yet fair minded critique of the traditional arguments for the existence of God He then explores a number of other important issues relevant to religious belief such as the problem of suffering and the relationship between religion and morality in each case arguing that atheism is preferable to theism The book will appeal to both students and professionals in the philosophy of religion as well as general audiences interested in the topic Across the Great Divide Wayne Karol, 2004-10-13 Praise for Wayne Karol s The Sixties as Science Fiction An Appreciation of Paul Kantner Easily the best thing I ve ever seen written on him and his music and what it all means Jeff Tamarkin author of Got A Revolution The Turbulent Flight of Jefferson Airplane One of the finest pieces of writing about music and society that it s been my pleasure to read Bill Parry co editor Holding Together The Sixties were such a long time ago why can't America seem to stop re fighting the battles we fought then Why are we still so bitterly divided Why does so much of what s happening now seem like weird repetitions of the past from the Monica Lewinsky scandal and Watergate to Iraq and Vietnam In Across the Great Divide Wayne Karol offers an original and insightful perspective on how we ended up in this mess and what we might be able to do about it It's his duty as a baby boomer to hope that it will change the world

Glattfelder, 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age old enigmas of existence Over 300 years ago the human mind discovered the machine code of reality mathematics By utilizing abstract thought systems humans began to decode the workings of the cosmos From this understanding the current scientific paradigm emerged ultimately discovering the gift of technology Today however our island of knowledge is surrounded by ever longer shores of ignorance Science appears to have hit a dead end when confronted with the nature of reality and consciousness In this fascinating and accessible volume James Glattfelder explores a radical paradigm shift uncovering the ontology of reality It is found to be information theoretic and participatory yielding a computational and programmable universe **Mysticism and Experience** Alex S. the pool of evolving human consciousness They yearn with all humanity for a deep connection with the Ultimate Source They reenact the timeless struggle against the violence and greed that prevents humankind from realizing that goal of Severe and Arduous Trials Lynn Brunet, 2009 The artist Francis Bacon 1909 1992 and the writer Samuel Beckett 1906 1989 both convey in their work a sense of foreboding and confinement in bleak ritualistic spaces This book identifies many similarities between the spaces and activities they evoke and the initiatory practices of fraternal orders and secret societies that were an integral part of the social landscape of the Ireland experienced by both men during childhood Many of these Irish societies modelled their ritual structures and symbolism on the Masonic Order Freemasons use the term spurious Freemasonry to designate those rituals not sanctioned by the Grand Lodge The Masonic author Albert Mackey argues that the spurious forms were those derived from the various cult practices of the classical world and describes these initiatory practices as a course of severe and arduous trials This reading of Bacon's and Beckett's work draws on theories of trauma to suggest that there may be a disturbing link between Bacon's stark imagery Beckett's obscure performances and the unofficial use of Masonic rites Zen Buddhism and the Reality of Suffering Tullio Giraldi, 2024-09-10 This book offers an accessible guide to the role that Zen has played and alongside Buddhism might play in both Eastern and Western attempts to alleviate mental suffering Since its beginnings 2500 years ago the central belief of Buddhism has been that what we perceive as reality is a mental representation a religious belief which has since been substantiated by the evidence of neuroscience The work and progress of clinical medicine psychiatry and psychology have attempted to alleviate the sufferings of life but the current approaches to mental health in psychiatry the neurosciences and cognitivism don't fully address the complexity and mutual inter relationship of the variety of factors involved in mental suffering and its non linear and chaotic aspects Zen Buddhism on the other hand encourages access to reality and so this book will explore scientifically the ways in which it s guiding principles can be deployed to support and enhance Western clinical solutions to mental strife Rock Music Mark Spicer, 2017-07-05 This volume gathers together twenty articles from among the best scholarly writing on rock music published in academic journals over the past two decades These diverse essays reflect the wide range of approaches that scholars in various disciplines have applied to the study of rock from those that address mainly the historical sociological cultural and technological factors that gave rise to this music to those that focus primarily on analysis of the music itself This collection of articles some of which are now out of print or otherwise difficult to access provides an overview of the current state of research in the field of rock music and includes an introduction which contributes to the ongoing debate over the distinction or lack thereof betweenrock andpop **Starstruck** Albert A. Harrison, 2007-04-01 We live in an era of exploding scientific knowledge about the universe and our place and future within it Much of this new knowledge conflicts with earlier wisdom and some has frightening implications Cosmic evolution space exploration the search for extraterrestrial life and concerns about humanity s future prompt us to seek new answers to old existential questions Where did we come from Why

are we here Are we alone What will become of us In our search for answers we turn to science religion myth and varying combinations thereof Exploring an ambiguous region between recognized findings and unfettered imagination Starstruck explores the multifaceted far reaching and often contentious attempts of people with contrasting worldviews to develop convincing and satisfying interpretations of rapidly accumulating discoveries in physics astronomy and biology **Tunnel** Thomas Metzinger, 2009-03-17 A radical rethinking of the nature of consciousness **Philosophy of Mysticism** Richard H. Jones, 2016-03-23 A comprehensive exploration of the philosophical issues raised by mysticism This work is a comprehensive study of the philosophical issues raised by mysticism Mystics claim to experience reality in a way not available in normal life a claim which makes this phenomenon interesting from a philosophical perspective Richard H Jones s inquiry focuses on the skeleton of beliefs and values of mysticism knowledge claims made about the nature of reality and of human beings value claims about what is significant and what is ethical and mystical goals and ways of life Jones engages language epistemology metaphysics science and the philosophy of mind Methodological issues in the study of mysticism are also addressed Examples of mystical experience are drawn chiefly from Buddhism and Advaita Vedanta but also from Christianity Judaism Islam and Daoism This is a significant extension of the seminal work by Walter Stace Mysticism and Philosophy That work has stimulated much literature all of which Jones manages to review here He critically extends Stace s universal core and embeds it in a sophisticated discussion of the extent range and metaphysical implications of mysticism Ralph W Hood Ir coauthor of The Psychology of Religion An Empirical Approach **Ecomysticism** Carl von Essen, 2010-10-19 Explores the philosophy science and spirituality of nature mysticism and its Green calling Offers a solid bridge between spiritual practice and environmental activism Reveals how we can heal the environment by renewing our connection to it Shows how spiritual encounters in nature are healing the Nature Deficit Disorder of our psyches and bodies Many have been struck by a majestic moment in nature a sole illuminated flower in a shady grove an owl swooping silently across a wooded path or an infinitely starry sky and found themselves in a state of expanded awareness so profound they can feel the interconnectedness of all life These trance like moments of clarity unity and wonder often incite a call to protect and preserve the earth to support Nature as she supports us Termed nature mysticism people from all cultures have described such experiences However the ever increasing urbanization of the world's population is threatening this ancient connection as well as the earth itself In Ecomysticism Carl von Essen explores nature mysticism through the recorded experiences of outdoor enthusiasts as well as scientific studies in biology psychology and neuroscience Citing consciousness scholar William James and a variety of well known nature lovers such as Ansel Adams Henry David Thoreau and Ralph Waldo Emerson von Essen shows how the spiritual transcendence from an encounter in nature like other mystical experiences is healing the Nature Deficit Disorder of our psyches and bodies leading to an expansion of our worldview and a clearer understanding of our self and of our natural world Offering a solid bridge between spiritual practice and environmental activism von Essen s

spiritual ecology reveals how only through a renewal of humanity s spiritual connection to nature can we effect true environmental healing Answer to Jung Lynn Brunet, 2018-11-08 The Red Book is C G Jung s record of a period of deep penetration into his unconscious mind in a process that he called active imagination undertaken during his mid life period Answer to Jung Making Sense of The Red Book provides a close reading of this magnificent yet perplexing text and its fascinating images and demonstrates that the fantasies in The Red Book are not entirely original but that their plots characters and symbolism are remarkably similar to some of the higher degree rituals of Continental Freemasonry It argues that the fantasies may be memories of a series of terrifying initiatory ordeals possibly undergone in childhood using altered or spurious versions of these Masonic rites It then compares these initiatory scenarios with accounts of ritual trauma that have been reported since the 1980s This is the first full length study of The Red Book to focus on the fantasies themselves and provide such an external explanation for them Sonu Shamdasani describes The Red Book as an incomplete task that Jung left to posterity as a message in a bottle that would someday come ashore Answer to Jung brings its message to shore providing a coherent but disturbing interpretation of each of the fantasies and their accompanying images Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at http www taylorfrancis com under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Lost Ecstasy June McDaniel, 2018-06-26 This book is a study of religious ecstasy and the ways that it has been suppressed in both the academic study of religion and in much of the modern practice of religion It examines the meanings of the term how ecstatic experience is understood in a range of religions and why the importance of religious and mystical ecstasy has declined in the modern West June McDaniel examines how the search for ecstatic experience has migrated into such areas as war terrorism transgression sexuality drug use and anti institutional forms of spirituality She argues that the loss of religious and mystical ecstasy as both a religious goal and as a topic of academic study has had wide ranging negative effects She also proposes that the field of religious studies must go beyond criminalizing trivializing and pathologizing ecstatic and mystical experiences Both religious studies and theology need to take these states seriously as important aspects of lived human experience
