**Security in the Home** Andrew James McLean,1980 *SAFE AT HOME During Police Defunding and Rising Crime* David Craig,2021-04-05 No I don t presume you are an idiot But if you are this book should still be able to help you attain a well rounded understanding of effective crime prevention for the home Though introducing newer concepts like Crime Prevention Through Environmental Design it also covers all of the more familiar basics of home security It s a how to book that will reduce your fear of crime while making your home more safe and secure What you don t know can hurt you Knowledge of Crime Prevention is a prime example That very important body of information is unknown to most as it is kept a virtual secret Crime Prevention is not taught to children students worshippers soldiers or even cops This results in many unnecessary victims of property crimes and violent assaults Another big unknown to the general public is the large number of evil predators among us Most people don t want to think about that or their own personal vulnerability Only a small percentage of us perceive this reality and know the level of ever present danger It s cops paramedics firefighters and emergency room personnel who see the mayhem and victims of crime on a regular basis The rest of the population lives in blissful ignorance and complacency until such time as they may become victims themselves Police can t be everywhere at all times In many parts of the USA they are encouraged to be nowhere at all Police defunding has had predictable results with crime in many areas is quickly rising No one is immune to the threat of criminal victimization Personal diligence is required to maximize your safety and you must protect yourself But how Fortunately there have been a lot of advancements in

strategy tactics and technology focused on effectively preventing crime CPTED being chief among them Crime Prevention Through Environmental Design It s a big picture synergetic solution The pages ahead will offer you a comprehensive body of information and actions that you can take including traditional solutions to protect your family and your property You will likely come to view the environment around you differently as the pages ahead will expand the horizon of your situational awareness You ll attain a confident understanding of how to achieve much greater safety and security The process and tactics are simple and easy to comprehend Come on in and let s get started     *Secrets & Protection* Phrantceena Halres,2020-12-21 It Starts with You We are on the verge of a critical movement in this country one where each individual will start to recognize how easy it is to make a difference in the security of our country This collective consciousness will change the face of national security This is why it is important to understand that YOU as well as every other US citizen can make a difference Very few Americans are aware of the fact that 12 million violent crimes are committed per year in the United States with an estimated one fifth of the population falling victim to these crimes Aside from that it is well known that the threat of terrorism is always prevalent allusive and in many cases invisible We have domestic threats from criminals as well as foreign threats from terrorists But how can an individual citizen make a real difference in the protection of America It can be done and it is easier than you think Liberty and security do not compete in a zero sum game Our freedoms are the very foundation of our strength and security But the very definition of security usually requires a few questions that need to be answered before security measures are put in place Who or what are we trying to protect Who or what are we trying to protect it from It stands to reason that in light of the recent shootings bombings and other acts of violence we have a lot more to protect than just ourselves We have families neighborhoods communities businesses and the nation that all need our attention That s why it is so important for us to rededicate efforts to our personal and national security to ensure that what transpires in the course of our daily lives is protected There exist various types of safety There is personal safety and there is community safety the latter of which falls under local state and national security To begin with personal safety experts for decades have long studied what makes an individual more likely to be the target of any given crime As for national security those aims and targets are more difficult to see but can also be deterred with the same awareness I want to help you understand one main foundation of personal and community safety which exists in all of us It s that innate feeling we have when we know something isn t right in a situation or an environment It is the hair that stands up on our neck when we know that danger is imminent I call this our sixth sense which is the ability to intrinsically perceive possible threats without consciously knowing where that threat is coming from Think about it How many of us have the ability to naturally sense when something feels off yet these feelings are often dismissed or mocked Humans are the only animals who sense danger yet walk right into it Rather than offend the person who has triggered our fear instinct we usually choose being polite over being safe For example we might politely enter an elevator with a person who for some unknown reason has triggered our fear instinct

rather than risk appearing rude and waiting for the next elevator What people do not know is that there is now solid scientific evidence that their sixth sense can save their life Instinct Science is a rapidly emerging branch of research that studies the connection between subtle feelings and impending danger Consider that even the U S Navy includes the word 6th sense in their combat training briefs citing that some soldiers use it to feel danger before an enemy attack This may sound contrary to your conditioned beliefs of practicality and polite well being but how many times have you heard crime victims report having a gut instinct or warning prior to the actual incident The subsequent ignoring of these gut instincts was followed with a crime that could have otherwise been avoided or minimized had these gut instincts or warnings been heeded and respected as possible truths
