century America *The American Design Adventure, 1940-1975* Arthur J. Pulos, 1988 The American Design Adventure continues the fascinating and detailed examination of industrial design begun by Arthur Pulos in *American Design Ethic*. The first volume discussed and illustrated the objects and artifacts, the major designers and schools of design from Colonial times to the 1940s. This second splendidly illustrated volume carries the story into the heroic era of American industrial design from the 1940s to the 1970s. These were the decades of American industrial design's dominance when special exhibitions and world fairs made design a subject of national pride. Big business realized the influence that trademarks, packaging and corporate identity programs could have on their bottom line and the world of fashion created a consumer demand for name brands and well designed products. Industrial design flourished under the capable hands of Raymond Loewy and Charles Eames while corporations like IBM, RCA, Herman Miller and Knoll were sponsors of the great American design adventure. The extraordinary collection of illustrations that Pulos has assembled documents all of these important design trends while evoking the nostalgia of the 50s and 60s when Pop and Rock held sway. Pulos probes all aspects of industrial designers and their work in education and private corporations, in professional organizations and governmental agencies. He also covers prefabricated housing, graphics, manufactured products from the exotic to the pragmatic and public systems from the sociopolitical to the economic.

Understanding Industrial Design Simon King, Kuen Chang, 2016-01-20 With the coming flood of connected products many UX and interaction designers are looking into hardware design, a discipline largely unfamiliar to them. If you're among those who want to blend digital and physical design concepts successfully, this practical book helps you explore seven long standing principles of industrial design. Two present and former design directors at IDEO, the international design and innovation firm, use real world examples to describe industrial designs that are sensorial, simple, enduring, playful, thoughtful, sustainable and beautiful. You'll learn how to approach, frame and evaluate your designs as they extend beyond the screen and into the physical world. Sensorial: create experiences that fully engage our human senses. Simple: design simple products that provide overall clarity in relation to their purpose. Enduring: build products that wear well and live on as classics. Playful: use playful design to go beyond functionality and create emotional connections. Thoughtful: observe people's struggles and anticipate their needs. Sustainable: design products that reduce environmental impact. Beautiful: elevate the experience of everyday products through beauty.
