Reactions To The Persian Gulf War Editorials In The Conflict Zone:

Reactions to the Persian Gulf War Carrie Chrisco, 1995-11-08 Reactions to the Persian Gulf War is an interpretive study of editorials of major English newspapers published during the pre war and war periods in six countries in the Middle East that were involved in the war The newspapers examined are The Jordan Times The Syria Times The Arab News Saudi Arabia The United Arab Emirates News The Jerusalem Post and The Kayhan International Iran In its analysis the book attempts to answer questions such as Who are the major actors in the war and what role do they play in the war narrative What values are embedded in the editorials that reflect specific cultural and socio economic perspectives From what perspectives do the non Arab parties to the war namely Israel and Iran view the conflict This unique study provides a means by which students and scholars can investigate and understand issues that are important from both regional and global points of view Although a number of books have been written concerning the war readers will find that Chrisco's work fills an important void that the other books about the war have yet to fill and that is the view of the conflict from particular national perspectives Students scholars and media practitioners will all benefit from reading this book

Allies That Count Olivier Schmitt, 2018-03-01 What qualities make an ally useful in coalition warfare and when is an ally more trouble than it's worth Allies That Count analyzes the utility of junior partners in coalition warfare and reaches surprising conclusions In this volume Olivier Schmitt presents detailed case study analysis of several US allies in the Gulf War the Kosovo campaign the Iraq War and the war in Afghanistan He also includes a broader comparative

analysis of 204 junior partners in various interventions since the end of the Cold War This analysis bridges a gap in previous studies about coalition warfare while also contributing to policy debates about a recurring defense dilemma Previous works about coalition warfare have focused on explaining how coalitions are formed but little attention has been given to the issue of their effectiveness Simultaneously policy debates have framed the issue of junior partners in multinational military operations in terms of a trade off between the legitimacy that is allegedly gained from a large number of coalition states vs the decrease in military effectiveness associated with the inherent difficulties of coalition warfare Schmitt determines which political and military variables are more likely to create utility and he challenges the conventional wisdom about the supposed benefit of having as many states as possible in a coalition Allies That Count will be of interest to students and scholars of security studies and international relations as well as military practitioners and policymakers

War and the Media Philip M. Taylor, 1998-10-15 The Gulf War of 1991 was the highest profile media war in history Never before had so many journalists attempted to cover a war from both sides of the conflict This book traces the role of the media in the Gulf War and examines the attempts by both the coalition and Iraq to influence public opinion through propaganda and persuasion Philp Taylor asks how much the public was being told and how much was held back Analyzing the key news stories of the conflict he looks at the efforts of the American led coalition to persuade television audiences and newspaper readers to take a right view of what was happening and of the Iraqi government s propaganda campaigns concerning civilian damage and the Mother of all Battles

The 1949 Geneva Conventions Andrew Clapham, Paola Gaeta, Marco Sassòli, 2015-10-15 The four Geneva Conventions adopted in 1949 remain the fundamental basis of contemporary international humanitarian law They protect the wounded and sick on the battlefield those wounded sick or shipwrecked at sea prisoners of war and civilians in time of war However since they were adopted warfare has changed considerably In this groundbreaking commentary over sixty international law experts investigate the application of the

Geneva Conventions and explain how they should be interpreted today It places the Conventions in the light of the developing obligations imposed by international law on states armed groups and individuals most notably through international human rights law and international criminal law The context in which the Conventions are to be applied and interpreted has changed considerably since they were first written The borderline between international and non international armed conflicts is not as clear cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex mixed and transnational nature of certain non international armed conflicts The influence of other developing branches of international law such as human rights law and refugee law has been considerable The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions This commentary adopts a thematic approach to provide detailed analysis of each key issue dealt with by the Conventions taking into account both judicial decisions and state practice Cross cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the meaning of the Geneva Conventions in their contemporary context Prepared under the auspices of the Geneva Academy of International Humanitarian Law and Human Rights this commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts
