ability grouped reading and by the more egalitarian reading pedagogies introduced in the study Children's individual and collective experiences are brought to life through extended narratives that attend as closely to gesture posture visage silences and prosody of speech as to spoken words The book ends with a provocation how literacy pedagogy might change if reflexive noticing and dismantling of hierarchies become the compass of pedagogical change This demands attention to structural inequalities around race gender and class and a turn towards deep listening to children As well as being a valuable read for scholars of the sociology of childhood and education it should appeal to anyone concerned with making education more equitable including teachers school leaders parents carers and policymakers
