

### ABC costing

MK Ltd. manufactures four products, namely A, B, C and D using the same plant and process. The following information relates to a production period:

Product	A	B	C	D
Output in Units	720	600	480	504

The four products are similar and are usually produced in production runs of 24 units and sold in batches of 12 units.

The total overheads incurred by the company for the period are as follows:

Machine operation and maintenance cost	63,000
--	--------

(Phân bố tỉ lệ 4:3:2)

Setup costs	20,000 + 28,000 =
48,000	
Store receiving	15,000 + 21,000 = 36,000
Inspection	10,000 + 14,000 = 24,000
Material handling and dispatch	2,592

During the period the following cost drivers are to be used for the overhead cost:

Cost	Cost driver
Setup Receiving	No. of production runs
Store receiving	Requisition raised
Inspection	No. of production runs
Material handling and dispatch	Orders executed

It is also determined that:

- Machine operation and maintenance cost should be apportioned between setup cost, store receiving and inspection activity in the ratio 4:3:2.
- Number of requisition raised on store is 50 for each product and the no.of orders executed is 192, each order being for a batch of 12 units of a product.
