**Writing Every Day** Kellie Buis, Kat Mototsune, 2004 Many of today's schools struggle with large class sizes a continually evolving curriculum and a wide diversity in the ability and background of their students How best to build an effective literacy community in this constantly changing environment is an increasingly difficult challenge for teachers new and experienced alike In **Writing Every Day** Kellie Buis demonstrates that sharing stories is a fun and engaging way to motivate children and encourage cooperative learning in K-8 classrooms It proposes students writing letters every day as an efficient effective engaging and fun teaching strategy for organizing language instruction Children's personal stories become the catalyst for language experiences that involve reading writing and all forms of communication Teachers will find novel ways to bridge the gap between the important principles of sharing stories and practical ideas on how these understandings can be translated into classroom practice empower students to deepen and enrich their language skills by sharing their ideas feelings and experiences show students how to begin to make sense of themselves each other and the world create a strong partnership between school and home give children the ability to express themselves and to be heard by others in their community Student samples throughout the book illustrate the power of using their own life experiences to engage children in authentic reading and writing Writing daily letters gives children a stronger voice and engenders feelings of self-worth self-respect and competence This strategy reaps benefits beyond the language arts curriculum and helps students make connections and recognize patterns in everything that they read write and learn

Davies,R.H. Logie,1993-08-25 The last decade has seen a major growth in research on how memory is used in everyday life This volume represents a reaction to traditional laboratory bound studies of the first half of the century which sought to identify the fundamental principles of learning and memory through the use of materials and methods totally divorced from the real world The new wave of memory research has had considerable success in charting how memory develops the role it plays in educational and social skills and the impact of memory impairment on mental life The current volume consists of authoritative reviews of this emerging area linked to comment and criticism from major researchers in the field Contrasted probably for the first time are two major styles of research in applied memory research The naturalistic approach which has sought to study memory in everyday environments using actual experiences from people s lives as the raw data from which to derive more general principles and the applied cognitive approach whereby theories and methods are developed using orthodox laboratory techniques which are then validated by applying them directly to real phenomena This is one of the few books to bring together evidence across the very wide spectrum of humdrum activity that constitutes the everyday uses of memory
