

Reading Comprehension

Read the short passage and answer the questions.

The Dog and the Shadow

It happened that a Dog had got a piece of meat and was carrying it home in his mouth to eat it in peace. Now on his way home, he had to cross a plank lying across a running brook. As he crossed, he looked down and saw his own shadow reflected in the water beneath. Thinking it was another dog with another piece of meat, he made up his mind to have that also. So he made a snap at the shadow in the water, but as he opened his mouth the piece of meat fell out, dropped into the water and was never seen more.

1. What animal was crossing a board?

2. What did the dog have in his mouth?

3. What did the dog see in the running brook?

4. What is the moral of the story?

Motivational Beliefs Steve Graham, Gary A. Troia, Gustaf Bernhard Uno Skar, 2024-06-21 The study of students motivational beliefs about writing and how such beliefs influence writing has increased since the publication of John Hays 1996 model of writing This model emphasized that writers motivational beliefs influence how and what they write Likewise increased attention has been devoted in recent years to how teachers motivational beliefs about writing especially their efficacy to teach writing impact how writing is taught and how students progress as writers As a result there is a need to bring together in a Research Topic studies that examine the role and influence of writing beliefs Historically the psychological study of writing has focused on what students write or the processes they apply when writing Equally important but investigated less often are studies examining how writing is taught and how teachers efforts contribute to students writing What has been less prominent in the psychological study of writing are the underlying motivational beliefs that drive or inhibit students writing or serve as catalysts for teachers actions in the classroom when teaching writing This Research Topic will bring together studies that examine both students and teachers motivational beliefs about teaching writing This will include studies examining the operation of such beliefs how they develop cognitive and affective correlates how writing motivational beliefs can be fostered and how they are related to students writing achievement By focusing on both students and teachers beliefs the Research Topic will provide a more nuanced and broader picture of the role of motivation beliefs in writing and writing instruction This Research Topic includes papers that address students motivational beliefs about writing teachers motivational beliefs about writing or teaching writing Students motivational beliefs about writing include beliefs about the value and utility of writing writing competence attitudes toward writing goal orientation motives for writing identity epistemological underpinnings writing and attributions for success failure as examples Teacher motivational include these same judgements as well as beliefs about their preparation and their students competence and progress as writers to provide additional examples This Research Topic is interested in papers that examine how such beliefs operate develop are related to other cognitive and affective variables how they are impacted by instruction and how they are related to students writing performance Submitted studies can include original research both quantitative qualitative or mixed methods meta analysis and reviews of the literature **The Theory of Mind Under Scrutiny** Teresa Lopez-Soto, Alvaro Garcia-Lopez, Francisco J. Salguero-Lamillar, 2024-01-01 This book is a call to expand and diversify our approach to the study of the human mind in relation to the Theory of Mind It proposes that it is necessary to combine cross disciplinary methods to arrive at a more

complete understanding of how our minds work Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology and its focus on our capacity to ascribe mental states to other people this volume collects evidence and research to point to a more holistic understanding of our own minds the minds of others behavior language and reasoning This book therefore illuminates the conceptual intricacy underlying the Theory of Mind It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature function and development of our capacity to converge on biological processes of the brain towards consciousness emotion awareness and cognition The volume presents methods results critiques and models intended to provoke debates in various academic disciplines It is of interest to scholars working in psychology neuroscience philosophy of mind and artificial intelligence
