Galli, 2016-04-29 First published in 1991 Routledge is an imprint of Taylor Francis an informa company *Changing Security Agendas and the Third World* Lloyd Pettiford, Melissa Curley, 1999-08-27 Security has long been a central organizing concept of International Relations Until the 1980s students of the discipline understood its simple essence in terms of the arms race and balances of power Then reflecting changes encouraged by both the inter paradigm debate and the so called third debate security underwent radical reconsideration The many attempts to redefine the concept led to a proliferation of terms such as true security global security common security and environmental security However these terms have often been used in confusing and contradictory ways In attempting to help students deal with this confusion this book outlines the theoretical tools at the disposal of students for their own rethinking of the concept of security The book will help students wishing to seriously engage with IR s security debate at whatever level and draws its own conclusions as part of this debate *Africa at the Millennium* NA NA, 2016-04-30 This book is aimed at providing a framework for African issues in the 21st century Apart from its African centered approach it argues that previously marginalized areas of research require in depth study It also introduces new areas of interest absent in existing works The book pays particular attention to the relative success of African countries and regions in their attempt to find solutions to Africa s problems and the changing role in African states in international relations **Rethinking New Womanhood** Nazia Hussein, 2018-04-09 Covering India Bangladesh Pakistan and Nepal Rethinking New Womanhood effectively introduces a new wave of gender research from South Asia that resonates with feminist debates around the world The volume conceptualises new womanhood as a complex heterogeneous and intersectional identity By deconstructing classification systems and highlighting women s everyday ongoing negotiations with boundaries of social categories the book reconfigures the concept of new woman as a symbolic identity denoting modern femininity at the intersection of gender class culture sexuality and religion in South Asia The collection maps new sites and expressions on women and gender studies around nationhood women s rights transnational feminist solidarity new girlhoods aesthetic and sexualised labour respectability and modernity LGBT discourses domestic violence and new feminisms The volume will be of interest to students and scholars across a range of disciplines including gender studies sociology education media and cultural studies literature anthropology history development studies postcolonial studies and South Asian studies *Redefining security in the Middle East* Tami Jacoby, Brent Sasley, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license For over five decades the Cold War security agenda was distinguished by the

principal strategic balance that of a structure of bipolarity between the United States US and the Soviet Union USSR This book seeks to draw from current developments in critical security studies in order to establish a new framework of inquiry for security in the Middle East It addresses the need to redefine security in the Middle East The focus is squarely on the Arab Israeli context in general and the Palestinian Israeli context in particular The character of Arab Israeli relations are measured by the Israeli foreign policy debate from the 1950s to the 1990s A dialogue between Islam and Islamism as a means to broaden the terrain on which conflict resolution and post bipolar security in the Middle East is to be understood is presented The Middle East peace process MEPP was an additional factor in problematizing the military strategic concept of security in the Middle East The shift in analysis from national security to human security reflects the transformations of the post Cold War era by combining military with non military concerns such as environmental damage social unrest economic mismanagement cultural conflict gender inequity and radical fundamentalism By way of contrast to realist international relations IR theory developing world theorists have proposed a different set of variables to explain the unique challenges facing developing states Finally the book examines the significance of ecopolitics in security agendas in the Middle East

Redefining Ceasefires Marika Sosnowski, 2023-05-25 Since 2012 ceasefires have been used in Syria to halt violence and facilitate peace agreements However in this book Marika Sosnowski argues that a ceasefire is rarely ever just a cease fire Instead she demonstrates that

ceasefires are not only military tactics but are also tools of wartime order and statebuilding Bringing together rare primary documents and first hand interviews with over eighty Syrians and other experts Sosnowski offers original insights into the most critical conflict of our time the Syrian civil war From rebel governance to citizen and property rights humanitarian access to economic networks ceasefires have a range of heretofore underexamined impacts Using the most prominent ceasefires of the war as case studies Sosnowski demonstrates the diverse consequences of ceasefires and provides a fuller more nuanced portrait of their role in conflict resolution *Rethinking Environmental Protection* Phillip F.

Cramer,2000-01-01 Despite widespread popular support for environmental action Phillip F Cramer argues that current U S environmental policy approaches fail to address the real threat of environmental insecurity Cramer traces this failure to a reluctance to recognize and address the interconnectedness of natural forces just as all elements within the environment are linked so too should our perspectives on and responses to environmental degradation be linked In this book Cramer provides an innovative holistic approach to environmental protection that incorporates the best lessons learned from the fields of biology ethics philosophy political science law ecology and international relations He especially advocates local action and providing illustrative examples demonstrates how local action around the world is most effective when carried out within a global framework that supports information dissemination and international coordination This book will energize to thought and action any scholar student or general reader concerned with environmental issues and our current trajectory toward environmental decay **Lavender and Red** Emily K. Hobson,2016-11-01 LGBT activism is often imagined as a self

contained struggle inspired by but set apart from other social movements Lavender and Red recounts a far different story a history of queer radicals who understood their sexual liberation as intertwined with solidarity against imperialism war and racism This politics was born in the late 1960s but survived well past Stonewall propelling a gay and lesbian left that flourished through the end of the Cold War The gay and lesbian left found its center in the San Francisco Bay Area a place where sexual self determination and revolutionary internationalism converged Across the 1970s its activists embraced socialist and women of color feminism and crafted queer opposition to militarism and the New Right In the Reagan years they challenged U S intervention in Central America collaborated with their peers in Nicaragua and mentored the first direct action against AIDS Bringing together archival research oral histories and vibrant images Emily K Hobson rediscovers the radical queer past for a generation of activists today Constructing Global Order Amitav Acharya,2018-03-22 For a long

time international relations scholars have adopted a narrow view of what is global order who are its makers and managers and what means they employ to realize their goals Amitav Acharya argues that the nature and scope of agency in the global order who creates it and how needs to be redefined and broadened Order is built not by material power alone but also by ideas and norms While the West designed the post war order the non Western countries were not passive They contested and redefined Western ideas and norms and contributed new ones of their own making This book examines such acts of agency

especially the redefinitions of sovereignty and security shaping contemporary world politics With the decline of Western dominance ideas and agency from the Rest may make it possible to imagine and build a truly global order
