Kasperson, 2005 The Social Contours of Risk Volume I Publics Risk Communication and the Social Amplification of Risk We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social

existence In The Social Contours of Risk Volumes I and II two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume I collects their fundamental work on how risks are communicated among different publics and stakeholders including local communities corporations and the larger society It analyses the problems of lack of transparency and trust and explores how even minor effects can be amplified and distorted through media and social responses preventing effective management The final section investigates the difficult ethical issues raised by the unequal distribution of risk depending on factors such as wealth location and genetic inheritance with examples from worker and public protection facility siting conflicts transporting hazardous waste and widespread impacts such as climate change

Reducing Animal Use in Carcinogenicity Testing Joseph Manuppello, Jan Willem Van Der Laan, Federica Madia, 2024-12-31 Carcinogenicity to rats and mice is evaluated for substances to which humans are exposed including pharmaceuticals agrochemicals and industrial chemicals For pharmaceuticals recent efforts to reduce animal use in long term studies include an addendum to the International Council for Harmonisation ICH guideline S1B R1 that prioritizes short term studies in transgenic mice and recommends assessing the weight of evidence available to first determine whether a long term study in rats would add value For other sectors an expert group of the Organisation for Economic Cooperation and Development OECD is developing an Integrated Approach to the Testing and Assessment IATA of non genotoxic carcinogens based on common hallmarks of cancers and on key characteristics of carcinogens Within current regulations animal use could be reduced by evaluating toxicokinetics in main study animals with microsampling methods by including only one negative control group and by genotyping transgenic mice instead of using positive control groups in each study
