Reengineering Business Processes And People Systems:

BUSINESS PROCESS RE-ENGINEERING Dr. Abhijit Chakraborty, **Business Process Reengineering** Heru Susanto, Fang-Yie Leu, Chin Kang Chen, 2019-03-08 This volume shows how ICT information and communications technology can play the role of a driver of business process reengineering BPR ICT can aid in enabling improvement in BPR activity cycles as it provides many components that enhance performance that can lead to competitive advantages IT can interface with BPR to improve business processes in terms of communication inventory management data management management information systems customer relationship management computer aided design computer aided manufacturing CAM and computer aided engineering This volume explores these issues in depth **Software Methods for Business**

Reengineering Alfs Berztiss, 1996 An approach to reorganising businesses using software engineering as a guiding paradigm The author argues that software engineering provides both the necessary analytical expertise as well as the tools to transform process descriptions to support systems He begins by introducing the necessary concepts principles and practice before demonstrating how a business can define and construct the information base required As a result any manager or technically minded person will learn here how to implement the reengineering of a business The Utility Business Architecture EMA Services, Inc, 1997 **Work, Workflow and Information Systems** William B. Rouse, Andrew P. Sage, 2007 This volume brings together several perspectives on the nature of work processes in enterprises and how information systems can best support these processes The genesis of this idea was the shared interests of the authors in how enterprises improve and change The shared belief is that change of enterprises relates to change of work processes and the success of such changes relates to how work processes are supported by information systems Thus the papers in this volume address both the nature of work and the design of information systems to support work This volume is divided into two main sections work and workflow and information systems There are three papers in each section The disciplines represented across these six papers include management engineering computing and architecture These four disciplines pursue work workflow and information systems from quite different perspectives management to represent business practices and processes engineering to represent the physical flows in the system computing to represent the information flows and architecture to represent human flows within and among physical spaces Enterprises of course include all these types of flows *Business Process Change* Varun Grover, William J. Kettinger, 1995-01-01 Examines a broad range of research and case studies that throws light on potential social and human factors which determine the success of information technology
