**Beyond Training** Jack C. Richards,1998-02-13 Beyond Training examines the nature of second language teacher development and how teachers practices are influenced by their beliefs and principles It seeks to move discussion of language teacher development beyond the level of training which reflects a technical view of specific teaching practices Instead it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques but in an exploration of the knowledge beliefs and attitudes that underly their teaching practices

**Getting Into the Mathematics Conversation** Portia C. Elliott,Cynthia M. Elliott Garnett,2008 Far from a run of the mill readings book Getting into the Mathematics Conversation is an outstanding compendium of the very best of the NCTM school journals offerings on the broad subject of communication in the mathematics classroom It spans all grade levels and targets all communication forms listening and speaking reading writing and multiple forms that a teacher might wish to develop in students *Global Perspectives in the Geography Curriculum* Alex Standish,2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish s careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish s book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a

number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself

**Losing Our Language** Sandra Stotsky, 2002 This book argues that it is the incorporation of a multicultural agenda into basal readers the primary tool for teaching reading in elementary schools that has stunted American children's ability to read The book shows how basal readers have been systematically dumbed down in an effort to raise minority students' self-esteem It contends that while elementary readers of the past featured excerpts from classic stories such as *Arabian Nights* and *Robinson Crusoe* with a complex vocabulary and sentence structure able to challenge the imagination and build reading skills today's basal readers present students with politically and ethnically correct stories whose language is virtually foreign and unable to engage students According to the book drawing words from Swahili Spanglish and other trendy dialects to teach students with a shrinking English vocabulary is a symptom of this intellectual and cultural disorder The book showcases interviews with teachers gives an in-depth analysis of reading texts over the past 30 years and talks about how pressure groups have affected educational publishers It points out that literacy cultural and verbal gives all students but particularly those from poor or minority backgrounds personal independence and achievement and the ability to participate fully in civic life Each of the 11 chapters includes notes
