

Learning environments that facilitate reflection on language learning

Jo Mynard

In this paper, I describe a university course designed to facilitate awareness of the language learning process through the examination and adoption of various technology-based language learning tools (TULTs). I examine how three overlapping and complementary learning environments were used to facilitate the course and suggest that this arrangement of learning environments promotes reflection on language learning. The "Computer Assisted Language Learning" course was designed for third year university students majoring in English. The course was not a content-based course, but instead designed for language learners in order to (1) raise students' awareness of some TULTs, and (2) to support students in critically evaluating their own language learning needs and selecting appropriate strategies and tools. Although data were not systematically analyzed, there was evidence that the learning environments provided an effective opportunity for students to reflect on the language learning process. In this article I suggest that there are some benefits of using a combination of learning environments and call for further research investigating levels of reflection using the environments.

Appropriate use of CALL

The Internet offers a large number of resources for language learners and has great potential for language learning and immersion opportunities outside of scheduled class time. Due to the range of the material freely available online, learners have a range of websites and other TULTs at their disposal that could be of interest and ideal for meeting their language-learning needs. However, due to the amount of

Reflections On Language Learning

Reflections On Language Learning:

Reflections on Language Noam Chomsky, 1975 Noam Chomsky's work in linguistics has revolutionized our understanding of language. In these remarkable nontechnical Reflections Chomsky considers the point and purpose of studying language and explores some of the more general intellectual implications that result from the study of linguistics. The questions he considers are the classical ones. From Plato to the present time philosophers have been baffled and intrigued by how human beings with their limited and personal experience achieve such rich systems of knowledge, beliefs, and values systems that guide their actions and their interpretations of experience. In answer to this fundamental question Chomsky argues that the growth of language is analogous to the development of a bodily organ and is in large measure predetermined by genetic factors. Throughout these Reflections Chomsky offers incisive analyses of the controversies raging today among psychologists, philosophers, and linguists over the acquisition of cognitive structures, the way language interacts with other mental organs, and the way cognitive structures enter into and guide human activity. He explores the social and intellectual factors that have led to the dominance of certain ways of thinking and asks why the study of mind and behavior has so often followed a path remote from the general approach of the natural sciences. In examining some of the implications of recent work, he suggests that the conception of man as totally malleable not only is false but also serves naturally as a support for reactionary social doctrines. Publisher: *Reflections on Language and Language Learning* Marcel Bax, C. Jan-Wouter Zwart, 2001. In *Reflections on Language and Language Learning* In honour of Arthur van Essen, thirty-one leading language scholars and educational linguists in the Netherlands and abroad, with whom over the years Professor van Essen, one of the grandees of applied linguistics, has collaborated, provide original essays and studies which discuss the most recent insights and trends in the fields of linguistics and foreign language teaching. While interdisciplinary in scope, the volume encompasses theoretical advances in educational linguistic thinking. For example, the perceptive articles written by Michael Byram, Christopher N. Candlin, Natalia Gvishiani, Peter Jordens, Jan Koster, Leo van Lier, and Bondi Sciarone, as well as a sample of the latest methodological developments in areas such as ELT, LSP, and content-based language teaching, cases in point are the useful contributions by Jeanine Deen, Hilde Hacquebord, Michael Goethals, Paul Meara, Ignacio Rodríguez Sánchez, Rosamond Mitchell, Christopher Brumfit, and Uta Thörmel. *Reflections on Language Learning* Leila Barbara, Mike Scott, 1994. First published in 1994, Routledge is an imprint of Taylor & Francis, an information company. *Promoting Reflection on Language Learning* Neil Curry, Phoebe Lyon, Jo Mynard, 2023-09-12. This book brings together a wide range of studies, practical applications, and reflective accounts written by academics working at a university in Japan to present a cohesive overview of their collaborative efforts to promote learner reflection within their institution. The book contributes to a shift in language education towards promoting learner responsibility and ownership of their learning through developing a deeper sense of awareness of and motivation for the learning process. It makes a convincing case for showing that not only is

promoting reflection possible but it can also be effectively integrated into language learning activities with significant benefits to the learners The chapters are highly practical for researchers and practitioners with the research chapters containing instruments which make them ideal for replication studies The text includes a wealth of practical tools and activities for practitioners who will be able to experience first hand how to facilitate student success and increase satisfaction

Critical Pedagogy and Teacher Education in the Neoliberal Era Susan L. Groenke, J. Amos Hatch, 2009-07-30 Susan L. Groenke and J. Amos Hatch It does not feel safe to be critical in university based teacher education programs right now especially if you are junior faculty In the neoliberal era critical teacher education research gets less and less funding and professors can be denied tenure or lose their jobs for speaking out against the status quo Also we know that the pedagogies critical teacher educators espouse can get beginning K 12 teachers fired or shuffled around especially if their students test scores are low This paired with the resistance many of the future teachers who come through our programs predominantly White middle class and happy with the current state of affairs show toward critical pedagogy makes it seem a whole lot easier less risky even smart not to do critical pedagogy at all Why bother We believe this book shows we have lots of reasons to bother with critical pedagogy in teacher education as current educational policies and the neoliberal discourses that vie for the identities of our own local contexts increasingly do not have education for the public good in mind This book shows teacher educators taking risks seeking out what political theorist James Scott has called the small openings for resistance in the contexts that mark teacher education in the early twenty first century
