

Political Identity?

Three levels

Passive identities in the form of lived relationships (class, gender, ethnicity), but not acted on

Active – conscious identities that come to the fore when threatened eg racism

Politicized – a more constant base for actions and how individuals identify themselves

Reflections On Political Identity

Patrick J. Hanafin, Melissa S Williams

Reflections On Political Identity:

Reflections on Political Identity Anne Norton, 1988 Norton powerfully defends the inevitability and value of those particular concrete traits and actions whereby men differentiate themselves from one another Ethics *Political Identity and the Metaphysics of Politics* Gabriele De Anna, Manuele Dozzi, 2023-05-05 The chapters in this volume clarify the notion of political identity by focusing on the metaphysics of politics By analysing the notion of political identity they provide the conceptual resources for a deeper understanding of the theoretical and practical debates on populism the crisis of sovereignty the feasibility of a world government and ethical religious and cultural pluralism What is a political community Any answer to this question lies at the intersection between three fields metaphysics philosophy of action and political philosophy The question concerns how and why a plurality of individuals becomes a political unity what principles or forces keep that unity together and what threats that unity can encounter In this volume the contributors investigate how different metanormative views affect the possible answers to this metaphysical question They explore the role that the individual identities of agents play in grounding common practices that underpin political life They investigate the individual identities of agents as the result of the interplay between natural and cultural factors Finally they observe the ways in which a political community as a collection of individuals who hang together in an attempt to reach common purposes demonstrate a certain metaphysical solidity *Political Identity and the Metaphysics of Politics* will appeal to researchers and advanced students working in metaphysics political philosophy political theory and philosophy of action Identity, Difference William E. Connolly, 2002 **Liberalism, Nationalism, Citizenship** Ronald Beiner, 2003 Liberals believe that the purpose of politics is to guarantee that individuals do not face unfair impediments in pursuing the lives they choose for themselves Nationalists believe that the purpose of politics is to ensure that a people's sense of authentic nationhood wins full expression in powers of collective sovereignty or self rule Both of these forms of political commitment yield world transforming political philosophies but do either of these visions do adequate justice to a philosophically robust ideal of shared citizenship and civic membership In *Liberalism Nationalism Citizenship* Ronald Beiner engages critically with a wide range of important political thinkers and current debates in light of the Aristotelean idea that shared citizenship is an essential human calling Virtually every aspect of contemporary political experience globalization international migration secessionist movements the politics of multiculturalism pose urgent challenges to modern citizenship Beiner's work on the philosophy of citizenship is essential reading not just for students of politics and political philosophy but for all those who rightly sense that these kinds of recent challenges **Political Mourning** Heather Pool, 2021-05-21 *Political Mourning* examines four case studies the Triangle Fire Emmett Till's murder the attacks of September 11th and the Black Lives Matter movement to shed light on moments when everyday people died when their deaths were the basis of calls for political change and when such a change actually occurred Debating Political Identity and Legitimacy in the European Union Sonia Lucarelli, Furio Cerutti, Vivien

Schmidt, 2012-08-06 How can we conceptualize identity and legitimacy in the context of the European union What is the role of narratives political symbols public debate and institutional practices in the process of identity formation and legitimacy consolidation Debating Political Identity and Legitimacy in the European Union addresses these questions and brings together high profile scholars from various disciplinary backgrounds to debate the ontological and epistemological aspects of research on identity and legitimacy formation in the EU Part I investigates key elements such as the relationship between Europeanization of the EU member states and its effect on the political identity of their citizens the relationship between the politicization of the EU and processes of identity and legitimacy formation and the indispensability of European identity for legitimizing the EU Part II looks at pathways to identity formation and legitimacy construction in the EU by considering alternative types of constitutional legitimacy political symbolism Europeanization and politicization of the debate on EU focusing on the foreign policy domain Bringing together a wide but coherent range of high profile perspectives this book will of interest to students and scholars of European studies Political Science Philosophy Sociology and Law Legal Symbolism

Jiří Přibán, 2016-04-22 Jir Prib n s book contributes to the field of systems theory of law in the context of European legal and political integration and constitution making It puts recent European legislative efforts and policies especially the EU enlargement process in the context of legal theory and philosophy Furthermore the author shows that the system of positive law has a symbolic meaning reflecting how it also contributes to the semantics of political identity democratic power and moral values as well as the complex relations between law politics and morality *Reflections on Language Teacher Identity Research*

Gary Barkhuizen, 2016-11-10 Reflections on Language Teacher Identity Research is the first book to present understandings of language teacher identity LTI from a broad range of research fields Drawing on their personal research experience 41 contributors locate LTI within their area of expertise by considering their conceptual understanding of LTI and the methodological approaches used to investigate it The chapters are narrative in nature and take the form of guided reflections within a common chapter structure with authors embedding their discussions within biographical accounts of their professional lives and research work Authors weave discussions of LTI into their own research biographies employing a personal reflective style This book also looks to future directions in LTI research with suggestions for research topics and methodological approaches This is an ideal resource for students and researchers interested in language teacher identity as well as language teaching and research more generally *Identity, Narrative and Politics*

Maureen Whitebrook, 2014-04-04 Identity Narrative and Politics argues that political theory has barely begun to develop a notion of narrative identity instead the book explores the sophisticated ideas which emerge from novels as alternative expressions of political understanding This title uses a broad international selection of Twentieth Century English language works by writers such as Nadine Gordimer and Thomas Pynchon The book considers each novel as a source of political ideas in terms of content structure form and technique The book assumes no prior knowledge of the literature discussed and will be fascinating reading for

students of literature politics and cultural studies *Identity, Rights and Constitutional Transformation* Patrick J. Hanafin, Melissa S Williams, 2018-12-21 First published in 1999 this book provides an analysis of the role of constitutional governance from an international and interdisciplinary perspective The range of disciplines represented in the collection of papers aims to open new perspectives on topics that are frequently left to the expert hands of political scientists and lawyers alone It reveals scope for the further study of historical cultural and rhetorical approaches in tandem with traditional approaches The blend of cross national experience and comparisons and the fertilisation of one discipline by another should appeal to a wide interdisciplinary audience *Handbook of Political Anthropology* Harald Wydra, Bjørn Thomassen, 2018-11-30 This Handbook engages the reader in the major debates approaches methodologies and explanatory frames within political anthropology Examining the shifting borders of a moving field of enquiry it illustrates disciplinary paradigm shifts the role of humans in political structures ethnographies of the political and global processes Reflecting the variety of directions that surround political anthropology today this volume will be essential reading to understanding the interactions of humans within political frames in a globalising world Political Identity and Social Change Jamie Frueh, 2012-02-01 Political Identity and Social Change builds upon the constructivist theory of political identity to explore the social changes that accompanied the end of apartheid in South Africa To gain a better understanding of how structures of identity changed along with the rest of South Africa s institutions Frueh analyzes three social and political conflicts the Soweto uprisings of 1976 the reformist constitutional debates of 1983 1984 and post apartheid crime Analyzing these conflicts demonstrates how identity labels function as structures of social discourse how social activity is organized through these structures and how both the labels and their power have changed during the course of South Africa s transition In this way the book contributes not only to the study of South African society but also provides lessons about the relationship between identity and social change *Globalizing Care* Fiona Robinson, 2018-10-08 This book broadens the scope of thinking about ethics in global social relations criticizing the leading traditions in international ethics and exploring the ways in which some strands of feminist moral philosophy may offer an alternative perspective to view ethics in international relations Ukrainian Foreign and Security Policy Jennifer D.P. Moroney, Taras Kuzio, Mikhail A. Molchanov, 2002-04-30 A key country for stability and security in Europe Ukraine is struggling to create consistent foreign and security policies Political alliances identity struggles economic goals and geopolitical position all pull this newly emergent state in different and often conflicting directions Due to its dependencies on both the West and Russia Ukraine s foreign policy is in a state of flux To ensure stability in this newly emergent state the contributors to this volume argue that the West should be more assertive in offering an unambiguous developmental perspective supporting democracy and the rule of law and offer E U affiliation in the near future International Relations theory and Ukraine s foreign policy are examined in the first section followed by chapters exploring civil military relations Next comes a look at Ukraine s foreign and security policy orientations

in comparative context The book concludes with chapters focusing on matters of national identity ideology and their impact on Ukrainian security policy Scholars and analysts of contemporary Eastern European politics will be interested in what these well known scholars and government officials have to say about the contemporary state of affairs in this pivotal nation

European Ways of Law Volkmar Gessner, David Nelken, 2007-10-30 Can there be such a thing as a European sociology of law The uncertainties which arise when attempting to answer that straightforward question are the subject of this book which also overlaps into comparative law legal history and legal philosophy The richness of approaches reflected in the essays including comparisons with the US makes this volume a courageous attempt to show the present state of socio legal studies in Europe and map directions for its future development Certainly we already know something about the existence of differences in the use and meaning of law within and between the nation states and groups that make up the European Union They concern the role of judges and lawyers the use of courts patterns of delay contrasts in penal sensibilities or the meanings of underlying legal and social concepts Still similarities in legal culture are at least as remarkable in societies at roughly similar levels of political and economic development The volume should serve as a needed stimulus to a research agenda aimed at uncovering commonalities and divergences in European ways of approaching the law

Identity in Community Paul Kwong, 2011 The term ContactZone was coined in postcolonial discourse to signify the place where cultures and religions meet It implies that first contact cultural religious exchange and conflict have always been determined by power relations Through making use of communication theories hermeneutics and aesthetics intercultural theology generates new terminologies and theoretical tools to explore these interactions Its scope ranges from issues such as dialogue and syncretism to fundamentalism and ethnicity Perspectives of culture religion race class and gender alike are involved in the necessary multi axial approach ContactZone is going to create a space where a choir of multiple voices is responding to the challenges of the

cultural religious pluralism of the 21st century Archbishop Paul Kwong 1950 develops the idea of identity in community as central to the mission and theological agenda of Christians in Hong Kong In a wide ranging multidisciplinary study he analyzes diverse perspectives on the territory's recent history and compares the methodological approaches of local theologians with contextual theologies from other parts of the world He argues that the overlapping cultural and religious identities of Christians in the Hong Kong Special Administrative Region SAR of China can empower Hong Kong people to embrace rather than to exclude differences and otherness so that they can accept and live out their identities in community without having to make a choice for one among the many

Terms of Exclusion Zein Murib, 2023 LGBT political movements in the United States have been successful in expediting the growing acceptance of sexual and gender minorities and increasing public support for LGBT rights However not all segments of what has come to be called the LGBT community have benefited from these gains even marginalized identity groups have internal hierarchies that determine whose political claims are heard or ignored In *Terms of Exclusion* Zein Murib looks at the LGBT community in the US as it formed into an identity based social and political group Drawing on an extensive archive of movement documents and publications Murib argues that the strategic use of rightful citizenship claims or the assertion that lesbians gay men bisexuals and transgender people are owed rights as citizens created opportunities for the recognition of white gender normative monogamously partnered gay men and lesbians at the expense of other community members The rights wins made as a result of these opportunities are celebrated as evidence of progress even while they simultaneously foreclose representation and political gains for those members whose cross cutting identities challenge or elude the boundaries of normative citizenship By focusing on the effects of mobilization tactics seeking assimilation Murib shows that within group marginalization is not an accident of political expediency or due to relatively fewer resources but rather a discursive strategy employed by political actors to make a group palatable to lawmakers and the general public *Terms of Exclusion* thus constitutes a significant revision to existing scholarship on LGBT politics in political science and joins a growing body of interdisciplinary work that focuses on how a seemingly benign

strategy of political movements foregrounding citizenship claims entails silence and erasure for the most precarious members of the group
