Identities and Social Change in Britain Since 1940 Michael Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike

Decolonizing Democratic Education, 2008-01-01 The essays in this edited collection open up a hopeful dialogue about the existing state of democratic education and the ways in which it could be re imagined as an inclusive democratized space of possibility and engagement Proceeding from a critique that questions the dominance of Western liberal understandings of democratic education as a series of rational culturally neutral acts undertaken by individuals who conceive of democracy and the common good in universalist and fundamentally exclusionary terms the contributors give voice to those whose ideas histories cultures and current understanding of the world is not highlighted in the dominant relationships of schooling From a variety of theoretical and pragmatic approaches the chapters in this collection engage the dialectics of history power colonization and decolonization identity memory citizenship Aboriginal rights development and globalization all in the context of providing a critique of educational systems relations

structures and curricula that seem badly in need of reform While the contributors who have diverse scholarly interests are not in a direct dialogue with one another their different foci should nevertheless inter topically inform each other The book should interest students and researchers in the general foundations of education democracy and education citizenship education comparative and international education postcolonial studies in education and cultural studies in education

Rewriting the Dream ,2022-07-18 Costerus is a longstanding book series for state of the art research in the field of English language literature s Besides the more classical research in English American and Irish literature we offer a platform for new directions in literary studies in relation to translation studies minority literatures ecology medical humanities hemispheric studies transatlantic studies network studies and social sciences as well as reflections on studies in English literature as a discipline **Popular Piety and Political Identity in Mexico's Cristero Rebellion** Matthew

Butler,2004-06-17 Dr Butler provides a new interpretation of the cristero war 1926 29 which divided Mexico s peasantry into rival camps loyal to the Catholic Church cristero or the Revolution agrarista This book puts religion at the heart of our understanding of the revolt by showing how peasant allegiances often resulted from genuinely popular cultural and religious antagonisms It challenges the assumption that Mexican peasants in the 1920s shared religious outlooks and that their behaviour was mainly driven by political and material factors Focusing on the state of Michoac n in western central Mexico the volume seeks to integrate both cultural and structural lines of inquiry First charting the uneven character of Michoac n s historical formation in the late colonial period and the nineteenth century Dr Butler shows how the emergence of distinct agrarian regimes and political cultures was later associated with varying popular responses to post revolutionary state formation in the areas of educational and agrarian reform At the same time it is argued that these structural trends were accompanied by increasingly clear divergences in popular religious cultures including lay attitudes to the clergy patterns of religious devotion and deviancy levels of sacramental participation and commitment to militant social Catholicism As peasants in different communities developed distinct parish identities so the institutional conflict between Church and state acquired diverse meanings and provoked violently contradictory popular responses Thus the fires of revolt burned all the more fiercely because they inflamed a countryside which then as now was deeply divided in matters of faith as well as politics Based on oral testimonies and careful searches of dozens of ecclesiastical and state archives this study makes an important contribution to the religious history of the Mexican Revolution *The Canon and the Curricula* E. Eugene Helm,1994 After a century of trial and error in the task of defining itself the discipline of musicology had gradually gained a hard won place on American university campuses Now the musicological curriculum is being challenged by such phenomena as political correctness questioning the canon and ethnomusicological expansions or contractions of the traditional boundaries of historical musicology These challenges are caused says the author of this book by the most powerful social force of our time namely the ambition to foster or restore individual cultural ethnic and political identities Step by step Professor Helm has

shown the importance of upgrading undergraduate music programs Graduate training in musicology would make a quantum leap ahead if undergraduate curricula in music were properly overhauled to make room for that rare undergraduate who is gifted as both musician and scholar If the current E mail of American musicologists is any indication the topic of the musical canon is hotter than ever *Reaganism in Literary Theory* Jeremiah Bowen,2020-07-15 Reaganism is a discourse of devotion and disqualification combining a neoliberal negative theology of the market with a neoconservative demonization of opponents Reagan s personality cult shelters the aggressivity of a war of all against all by representing the market as a moralistic standard of perfection a representation of goodness and freedom In literary theory and criticism a homologous valuative system centered itself on the canon representing culture as a study of perfection Paul de Man argued for the displacement of this positive moralistic reference but his proposals ultimately replace it with a negative moralistic reference to literariness De Man s premises have been perpetuated in subsequent theory by persistent misrecognitions of dialectic as suspicious hermeneutics of materialism as reference to materiality and of demands for democratic equity as identity politics Tracing this motivated reasoning through misreadings of Eve Sedgwick s critique of conspiracy theory and Edward Said s secular criticism we are led back to the unexamined premises of Paul de Man s negative moralism and the opportunistic competition of academic careerism Research In Multicultural Education Carl A. Grant,2005-06-21 A work specifically written to encourage research into multicultural education and to help researchers work through some of the inherent problems that face schools with mulicultural students *The Oxford Handbook of Soviet Underground Culture* Mark Lipovetsky,Maria Engström,Tomáš Glanc,Ilja Kukuj,Klavdia Smola,2024 In 1932 the Central Committee of the Communist Party issued the resolution On the Restructuring of Literary and Arts Organizations This resolution put an end to the coexistence of aesthetically different groups and associations of writers and artists that had been common during the 1920s and instead led to the establishment of the monopoly of Socialist Realism in 1934 Ironically this resolution unwittingly created a rich literary and artistic production of underground intellectuals known as the Soviet underground during an era of political and aesthetic censorship in the Soviet Union The Oxford Handbook of Soviet Underground Culture is the first comprehensive English language volume covering a history of Soviet artistic and literary underground In forty four chapters an international group of leading scholars introduce readers to a web of subcultures within the underground highlight the culture achievements of the Soviet underground from the 1930s through the 1980s emphasize the multimodality of this cultural phenomenon and situate the study of underground literary texts and artworks into their broader theoretical ideological and political contexts The volume presents readers with several approaches to mapping the underground that include chapters on nonconformist cultures in Ukraine Belarus Baltic countries Central Asia and provincial cities of Russian Federation Finally the volume also provides an analysis of groups shaped around religious and cultural identity as well as queer and feminist underground circles **Emancipatory Human Rights and the University** Felisa Tibbitts,André

Keet,2023-08-25 This volume explores the application of human rights to higher education through a critical lens Combining theoretical and applied perspectives it asks what a human rights framework grounded in liberation and justice can offer to ways of working and teaching practices in higher education Human rights in this edited compilation call for continuous critical engagements around the higher education transformation project The book recognizes human rights simultaneously as law values and emancipatory vision It showcases global north and global south perspectives and encourages a dialogue between the human rights approach and other approaches to higher education transformation such as decolonialization anti racism diversity and inclusion and intersectionality Individual chapters featuring a range of case studies written from global south and north perspectives critically examine higher education practices linked with human rights ranging from curricular practices to student activism and community partnerships The critical space of the university and its role in the transformation of society is therefore viewed in multi dimensional ways Underlining the value of applying human rights as a framework in understanding and designing higher education transformation the book will be of great interest to scholars researchers and post graduate students in the fields of the sociology of education human rights education higher education and social justice education
