Reform And Transformation In Communist Systems:

Reform and Transformation in Communist Systems Ilpyong J. Kim, Jane Shapiro Zacek, 1991 The Transformation Of Communist Systems Bernard Chavance, Charles Hauss, Mark Selden, 2019-06-26 In the confrontation between the two main economic systems that has marked the twentieth century capitalism has been declared the winner by default over its adversary socialism Today establishing a market economy has become the primary goal of the formerly socialist countries The history of economic reform helps explain this remarkable turning point Attempts to improve the old centralized system by expanding enterprise autonomy in Poland the Soviet Union and East Germany and more radical reforms that limited the role of central planning in Yugoslavia Czechoslovakia Hungary and China encountered social and political obstacles or had unexpected and undesired effects During the 1980s the idea of a socialist market economy which had been seen as a third way between capitalism and centralized socialism was abandoned as economists gradually came to support a free market rather than the dogma of planning Through a comparative and historical analysis of change in socialist and post socialist systems this timely and original book clarifies the policies and pitfalls in this extraordinary transition Bernard Chavance provides a succinct introduction and analysis of the politics and economics of Eastern Europe from the creation of the Stalinist system in the Soviet Union through what he argues have been three major waves of reform since the 1950s to the dismantling of most socialist governments in the 1990s Exploring the link between the one party regime and the growing rigidity of socialist economic systems the author analyzes the failure of both incremental and radical reforms to adapt to new economic challenges thus leading to the ultimate collapse of communist regimes in Europe **Adaptation And Transformation In Communist And Post-communist Systems** Sabrina Petra Ramet, 2019-03-04 This book tackles different aspects of the adaptive and transformative process in communist and post communist systems in Eastern Europe offering competing models which locate the explanatory variable in different places and account for the unfolding of change in different ways The Political Economy of Asian Transition from Communism Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work *Reform of the Socialist System in Central and Eastern Europe* Martin J.

Bull, Mike Ingham, 2016-07-27 This book analyzes the reform of the socialist system in Central and Eastern Europe and the former Soviet Union. Uniquely, it adopts a multi-disciplinary perspective which includes authors from both Western Europe and the former Communist world. The volume contains analyses of the prospects for civil society, economic reform and privatisation, theories of economic transition and the role of the state, political change and the persistence of former Communist parties, the prospects for democracy in the former Soviet Union and gender aspects of labour market reform.

The Political Logic of Economic Reform in China Susan L. Shirk, 2023-04-28 In the past decade, China was able to carry out economic reform without political reform, while the Soviet Union attempted the opposite strategy. How did China succeed at economic market reform without changing communist rule? Susan Shirk shows that Chinese communist political institutions are more flexible and less centralized than their Soviet counterparts were. Shirk pioneers a rational choice institutional approach to analyze policy making in a non-democratic authoritarian country and to explain the history of Chinese market reforms from 1979 to the present. Drawing on extensive interviews with high-level Chinese officials, she pieces together detailed histories of economic reform policy decisions and shows how the political logic of Chinese communist institutions shaped those decisions. Combining theoretical ambition with the flavor of on-the-ground policy making in Beijing, this book is a major contribution to the study of reform in China and other communist countries. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994. The Political Economy of Dual Transformations David L. Bartlett, 2010-05-06 In the early 1990s, scholars voiced skepticism about the capacity of Eastern Europe's new democracies to manage simultaneous political and economic reform. They argued that the surge of popular participation following democratization would thwart efforts by successor governments to enact market reforms that imposed high costs on major elements of post-Communist society. David Bartlett challenges the conventional wisdom regarding the hazards of dual transformations, far from hindering marketization, democratization facilitated it. Bartlett argues that the transition to democracy in East Central Europe lowered the political barriers to market reforms by weakening the ability of actors most vulnerable to marketization to manipulate the existing institutional structure to stop or slow down the process. Although the analysis focuses on Hungary, whose long history of market reforms makes it an ideal vehicle for assessing the impact of institutional change on reform policy, the author shows how his findings call into question the use of shock therapy and arguments based on the experience in East Asia that economic development and democratization are incompatible. This book will appeal to economists, political scientists, and

others interested in transition problems in formerly communist countries democratic transitions and the politics of stabilization and adjustment David L Bartlett is Assistant Professor of Political Science Vanderbilt University
