Kennedy, 1999 In *The Contemporary Pennsylvania Legislature* John J. Kennedy explores a variety of topics that are relevant for any small lawmaking institution. He investigates to what degree current social and technological changes have affected the Pennsylvania legislature and how it has been transformed from a part time lawmaking body to a full time professional institution. The data for Kennedy's study comes from a survey of legislators who served in the 1993-1994 Pennsylvania Assembly as well as candidates who ran for office but were defeated. Noting that political parties are on the decline in the U.S., Kennedy examines whether lawmakers are more inclined to follow their own interests, their parties or those of their constituents when voting on particular issues. In addition to discussing the philosophical dispositions of legislators, he also examines the electoral experiences of defeated candidates. Kennedy's study is an important resource for those interested in American government, the legislative process or political science. *Burton Barr* Philip VanderMeer, 2014-11-06 Politics like poker requires timing and risk and Burton Barr of Arizona knew it. The deal maker of Arizona politics would say, "You gotta know when to hold them." For more than two decades Barr played his political cards with skill as he led Arizona through an era of enormous growth and success. Considered perhaps the most influential person in Arizona's political development, Burton Barr represented north central Phoenix in the Arizona House of Representatives for the twenty-two years from 1964 to 1986. As the Republican House Majority Leader for twenty of those years, he left his fingerprints on every major piece of legislation during those decades, covering such issues as air pollution, health care for indigents, school aid, the tax code, prison reform, child care, groundwater management, and freeway funding. Burton Barr's political life unfolded during the very time his state and region shifted from being outliers to trendsetters. His choices in policy making and his leadership style were both an outcome and a creator of his sociopolitical environment. Arizona politics in the 1960s and 70s was a rich brew of key elements: a time when the economy was being transformed, the nature and distribution of populations shifted, partisan politics were in flux, and the very lifeblood of the West, water, was being contested under increasing pressures of usage and depletion. How Barr successfully responded to those challenges is the story of Arizona's development during those years. At the heart of it, Barr's political life and personality are inextricably bound up with the life of the West. *The High Priests of American Politics* Mark Carlton Miller, 2002-03 Using a multidisciplinary approach, Mark C. Miller draws in large part on interviews he

conducted with members of the U S House of Representatives the Ohio legislature and the Massachusetts legislature From this rich data he shows how American lawyers are socialized into a common legal ideology which in turn shapes the behavior of individual lawyer politicians legislative committees dominated by lawyers and the entire legislative institutions of government

**Governors, Agenda Setting, and Divided Government** Laura A. Van Assendelft, 1997-02-20 This book examines divided government from a new perspective By turning to governors and agenda setting the stage of the policymaking processes where the opportunities for success in terms of legislative output are defined perhaps the real impact of divided government may be observed This book compares the agenda setting strategies of four governors two in states with divided government and two in states with unified government The analysis is based on legislative records the governors state of the state addresses and in depth interviews conducted with the governors their staff members state legislators and journalists Although divided government does not produce gridlock or stalemate at the state level it is not without impact on governing Divided government helps to explain a governor's choice of strategy in agenda setting influencing whether he will work primarily within the system or go public However a combination of other factors also affect the agenda setting process The four case studies provide examples of how agenda setting strategies are explained best by the interplay between personal characteristics of a governor including his experience and personality and political factors including electoral outcomes the governor's popular support and his relationship with the legislature in addition to divided or unified party control
